

# NHS Shetland

<b>Meeting:</b>	<b>Shetland NHS Board Meeting</b>
<b>Meeting date:</b>	<b>28<sup>th</sup> April 2026</b>
<b>Title:</b>	<b>Strategic Risk Register Report</b>
<b>Agenda reference:</b>	<b>Board Paper 2026/27/06</b>
<b>Responsible Executive/Non-Executive:</b>	<b>Kirsty Brightwell, Medical Director / Brian Chittick, Chief Executive</b>
<b>Report Author:</b>	<b>Edna Mary Watson, Chief Nurse (Corporate)</b>

## 1 Purpose

The Strategic Risk Register is formally reported to the NHS Board for

- Awareness and
- Decision.

having been formally considered at the Audit & Risk Management Group on 18 March and Audit and Risk Committee on 31 March 2026.

The NHS Board is asked to note the status of the Strategic Risk Register, reviewing, amending or, confirming that the strategic risks are being managed.

The NHS Board are also asked to consider if there are any new strategic risks that should be added to the Register at this time

### **This report relates to:**

- NHS Board Governance Procedures

### **This aligns to the following NHSScotland quality ambition(s):**

- Safe
- Effective
- Person Centred

## 2 Report summary

### 2.1 Situation

The strategic risks were reviewed at the Audit and Risk Management Group (ARMG) meeting on 18 March 2026 and at the Audit and Risk Committee on 31 March 2026 taking account of any feedback received from Directors and/ or governance Committees.

The risks which the Standing Committees are responsible for were presented to each meeting of the respective Committee, over the time period April 2025 to March 2026.

Changes made to the Strategic Risk Register in terms of new and closed risks, and changes in risk scores and risk responses are outlined in the paper.

During the last year new sections on Procedures developed, Proposals presented and Horizon Scanning have been added to assist with the sharing of key information from ARMG to the Audit and Risk Committee and subsequently to the NHS Board.

A new structured approach to the RMG agenda, combined with an extended meeting time has been introduced, in order to support having time to discuss emergent issues as well as the standard risk management activity. The new format has proven to be conducive to the sharing of current challenges and risks across the organisation. The Risk Management Group has also extended it's remit to maintain oversight of the Internal Audit Actions and in order to better reflect the overall agenda, the group has been renamed the Audit and Risk Management Group (ARMG). This was Approved by the Audit and Risk Committee, at it's meeting on 25 November 2025.

Overall, whilst there has been some movement in risk scores, there has been very little movement in the Risks with the highest rating on the Strategic or Organisational Risk Register.

It should be noted that there are 8 Strategic Risks, 2 Organisational Risks and 2 Directorate level risks where the Adequacy of Controls are described as Inadequate, a summary of the factors causing this is provided.

Unfortunately, capacity within the Clinical Governance and Risk Team has continued to be an ongoing issue throughout 2025/26 with both longstanding vacancies and staff turnover creating additional challenges to progressing developments within the service, as well as providing ongoing support to teams across the Organisation.

The Clinical Governance and Risk Team Leader continues on a period of secondment to NHS Grampian on a part time basis until the end of May 2026. We have now been able to backfill this role with a member of local clinical staff having joined the team on secondment from 5 January until the end of May 2026.

## 2.2 Background

The Risk Management Strategy sets out the principles and approaches to risk management which are to be followed throughout NHS Shetland. These are aligned to The Orange Book: Management of Risk – Principles and Concepts (23 August 2021), HM Government and the Scottish Public Finance Manual (SPFM) 'Risk Management – Good Practice in the Scottish Public Sector' 2018. Scottish Government.

The purpose of the Risk Management Strategy is to achieve a consistent and effective application of risk management and enable it to be embedded into all core processes, forming part of the day-to-day management activity of the organisation.

The Board of NHS Shetland is corporately responsible for the Risk Management Strategy and for ensuring that significant risks are adequately controlled.

The Risk Management Strategy is currently under review and the current Risk Management Strategy will remain extant until the new version has been through the appropriate governance groups and presented to the NHS Board for final approval.

To support the Board a number of formal committees have been established and are responsible for various aspects of risk management, principally these are the Audit and Risk Committee (A&RC), Clinical Governance Committee, Finance and Performance Committee and Staff Governance Committee. All Board Committees are responsible for providing assurance on the effective management of risks relevant to their area of responsibility.

In addition, the A&RC has a responsibility for overseeing the implementation of the Risk Management Strategy, taking assurance from the Risk Management Group (RMG), which as noted above has now been renamed the ARMG.

The A&RC will report any exceptions to the Board as and when required via the Committee update.

Effective risk management will be achieved by:

- Clearly defining roles, responsibilities and governance arrangements for individuals, teams and committees within NHS Shetland
- Incorporating risk management in all Executive Management Team (EMT), Board, and Committee reports and when taking decisions
- Demonstrating and reinforcing the importance of effective risk management principles in our everyday activities
- Maintaining risk registers at all levels that are linked to the organisation's strategic objectives
- Monitoring and reviewing arrangements on a regular basis
- Seeking assurance that controls put in place to mitigate risks are effective.

## Strategic Risk Register

Risks contained in the Strategic Risk Register are the high level risks that could impact the delivery of longer term strategic objectives of the organisation. Risks can be escalated/de-escalated to and from lower level risk registers to the Strategic Risk Register.

Executive Directors have been supported to review the risks they are responsible for and work continues to support line managers throughout the organisation to review their risks and implement the risk format (if...then....resulting in) as outlined in the current Risk Management Strategy.

The Chief Nurse (Corporate) and Clinical Governance and Risk Team will continue to support staff with the identification, recording and management of risks across the organisation, as capacity permits and will focus on the updating of risks over the next few months as part of an overall data cleanse to prepare the risk register for its subsequent transfer to the Ideagen Healthcare Guardian system (formerly known as InPhase) during 2026.

## 2.3 Assessment

This report gives an overview of the current strategic risks and a summary of the strategic actions which are currently in place to mitigate those risks.

The Strategic Risk Register is managed and updated via the Datix risk management module by ARMG members. Datix Dashboard (Strategic Risk Register) shows a number of generic charts and tables.

These consist of:-

- current active risks
- current outstanding actions
- risk response
- adequacy of controls
- risk rating

Changes made to the risks within Datix are visible via the inbuilt audit function.

The strategic risks are reviewed by the relevant Executive Director before presentation at an ARMG meeting.

The standardised approach to having all risk review dates set for the end of the calendar month appears in general to be working better, providing a more consistent approach to the effective monitoring and timely review of the risks. However, in the last quarter it is evident that a number of the risks have been reviewed and a next review date set for a time period from the date of the last review, as opposed to selecting the end of the month. A reminder will be sent to all Directors to retain the practice of setting review dates for the end of the month in order to support timely monitoring and review.

In line with the actions outlined in the Risk Management Workplan 2025/26, the Clinical Governance and Risk Team have been focusing on supporting Managers to review in entirety the content of all risks held on their Risk Register to ensure that these are updated and remain current going forward. This is important preparation work for moving to the new healthcare governance system, Healthcare Guardian.

Following discussions at ARMG a section had been added to the Risk Register to check whether or not the control measures in place have been tested in practice and if so what was the outcome from the testing. As noted previously this is still a relatively new section on the Risk Register with variable levels of testing being noted. The Clinical Governance and Risk Team will support discussion on testing from the time of the next review of each individual Strategic risk.

An Internal Audit of Risk Management provided a recommendation that we add narrative to the control measures to indicate whether these are already in place or are being implemented.

An Overview of the Strategic Risks by Highest Rank 2025/2026 is presented in Appendix 1.

Appendix 2, provides the detail of the full Strategic Risk Register.

Appendix 3, provides details of the Community Health and Social Care Directorate Risks as recorded on the JCAD system. Risks relating to health services delivered through the CHSCP are noted on here. The Risk Matrix scoring template is also provided to support interpretation of these risks.

### **Summary of changes:-**

Overall there has been very little movement in any of the risks on the Strategic Risk Register. Where there have been changes or there are any particular points of note these are outlined below.

#### ➤ **Rating score increased or overall upward trend**

After a relatively steady risk rating of 12 (lower end of high risk) over the last year, SR13 Access to Services has been reviewed by the Director of Community Health and Social Care at the beginning of April 2026 and the risk rating increased to 16 (high risk).

This increase in risk rating is to reflect the persistent requirement to operate on a Business Continuity footing across a number of services, in particular noting that whilst the GP workforce is now more stable than previously that there has been an increase in vulnerability in the nursing service with a challenge in recruiting to posts where it is difficult to maintain nursing skills due to the low volume of work. Alternative service models, based on resident healthcare support workers, have been implemented for some of the non-doctor islands where it is easier to recruit a support worker from within the local community and support this individual and the community with the addition of visiting Registered staff on a regular scheduled basis.

#### ➤ **Rating scores decreased**

The following risks have been reviewed and a reduction in risk score recorded in the the last quarter of 2025/26:

#### **SR17: IT Failure due to Cyber Attack**

The risk rating for SR17 IT Failure due to cyber attack has been reviewed by the Chief Executive, upon taking over lead responsibility for Digital, and the risk score reduced from 16 (high risk) to 12 (high risk).

Having reviewed this area of practice the likelihood and consequence of this risk occurring has been reduced from Likely and Major (score of 16) to Likely and Possible (may occur occasionally) which has reduced the risk score to 12. This

reflects the number of measures in place to minimise the actual risk of failure as a result of any potential cyber attack.

### **SR 23 Climate Emergency and Net Zero**

Whilst this risk has recently been developed from the original Estates risk, SR14, considerable work has been undertaken to conduct a stocktake of the current position against the Scottish Government framework which is driving NHS Boards to achieve net zero by 2040 in order to reduce the risks from the Climate Emergency.

Following the stocktake, including a review of the action plan and governance arrangements resulting in the re-establishment of the Climate Change and Sustainability Group, the risk has been reviewed and re-presented to the ARMG meeting in March 2026, where both the revised risk and reduced score were approved.

### **SR21 and SR22 Strategic Financial Risks**

The Strategic Financial risks have been reviewed and their risk scores reduced as follows:

- SR 21 Strategic Financial Planning reduced from being medium risk with a risk score of 8 to a low risk, risk score of 2; and
- SR22 Strategic Financial Management Operational reduced from being medium risk with a risk score of 6 to medium risk, risk score of 4.

Both of these reductions in risk score are to reflect the overall organisational positive financial position with an anticipated breakeven end of year position.

### **Organisational Risk 1616 Lack of Emergency Lone Worker System**

Organisational Risk 1616 Lack of Emergency Lone Worker System, risk rating has been reduced to reflect progress made with implementation of the 'PeopleSafe' Emergency Alert Lone Worker Fob system across teams.

The Health and Safety Lead is overseeing the implementation and monitoring of the use of the fob system across services. It is anticipated that full roll out of the People Safe fobs will be completed shortly and thus it is anticipated that this risk rating will be able to be further reduced at that point.

### **Directorate Risk 1571 Audiology – single handed practitioner**

The Directorate Risk 1571 Audiology – single handed practitioner has been reviewed in the last quarter of 2025/26 by the Director of Nursing & Acute Services and the risk score reduced from 15 (high risk) to 9 (medium risk).

Through a period of redesign, work has been undertaken with NHS Grampian to develop closer working relationships and oversight of the local audiology service. Revisions were made to the Job Description to ensure that prospective applicants understood the nature of the service. The Healthcare Support Worker post is also being reviewed to develop the skillset of the current postholder to widen the range of activities that they can undertake to support the service. Partnership working with the RNID is being further developed so that the third sector can offer some resilience to the service. Following a recruitment process, a new Audiologist was appointed to the hybrid role and has taken up post in January 2026.

### **Directorate Risk 1609 - Incorrect Storage of Medical Records**

Directorate Risk 1609 has been reviewed and it's overall risk rating reduced from 16 (high) risk to 8 (medium) risk to reflect that some progress has been made to refile all of the documentation by the engagement of some additional Bank Staff capacity thus reducing the level of risk posed by the non-filing of clinical information.

➤ **Change in Risk Rationale**

SR08: Workforce has had a change in risk rationale.

During the comprehensive review of this risk, it was noted that whilst we have challenges in recruitment and retention, we are able to continue to provide most services, through operating various models of service provision that comprise a range of substantive and supplementary staff. However, this does create a significant financial risk to the organisation.

In order to try and mitigate this, a short-life working group has been established to look at how we attract substantive Consultants with the creation of ongoing adverts for expressions of interest, use of social media to support campaigns with short video clips. Rediscovering the Joy project has supported the provision of GPs and is having a positive impact on the number of filled weeks for NHS Shetland services.

Work is also ongoing at a national level with relevant Deaneries. It is hoped that the work undertaken in Scotland around pay reform will support individuals to work in Scotland, as well as the work on remote and rural careers, facilitated by Medical Education and the Viking Conference will help showcase the benefit of working in remote, rural and island communities delivering generic services.

The Board is also undertaking a further 2 rounds of International Nurse Recruitment in 2025 to support the recruitment of 2 nurses in each cohort, to support ongoing staffing requirements and maintain overall service delivery.

➤ **Risk descriptions updated**

No Risk Descriptions have been updated in this quarter. However, there are 3 Strategic risks, which, at time of writing, are currently subject to review.

These are:

- SR01: National Standards
- SR06: IG Training for NHS Staff
- SR11: IG training for non-NHS staff

Concerns were raised via Governance Committees and the NHS Board regarding the wording and overall risk rating of both SR11 and SR06 IG Training for NHS and non-NHS staff and therefore both of these risks are now subject to a comprehensive review. It is anticipated that revised or new risk(s) will be presented to the Risk Management Group in the next meeting cycle.

The Clinical Governance and Assurance risk, SR09, also requires comprehensive review as the current risk description is reflective of previous concerns prior to the Clinical Governance and Risk Team being placed under the clinical leadership of a senior nurse.

Review of any of these risks may lead to changes in the Risk Description.

➤ **Strategic Risks Closed**

Revised SR14 Estate climate and net zero has been closed, being replaced by SR23 Climate Emergency and Net Zero.

➤ **Adequacy of Controls**

The following Strategic risks have their Adequacy of Controls noted to be inadequate. The reasons for this are provided beside each risk.

**SR01 National Standards**

Gaps in controls were identified in relation to the Service Level Agreement (SLA) annual review with NHS Grampian being incomplete, and the risks associated with NHS Grampian capacity to deliver visiting services due to gaps in their workforce have continued. Some risks were also identified with the review of shared pathways and with the development of alternative models of care.

This risk was comprehensively refreshed within the last 12 months with additional measures being added to improve the control measures eg through introducing tests of change with other Boards involved in NECU, to reduce the number of people waiting over 12 weeks for Treatment Time Guarantees, and with the implementation of initiatives from the Centre for Sustainable Delivery and elective care programme improvement ideas being rolled out locally eg patient initiated follow up and 'opt in' services to support delivery against national standards, this has enhanced patients access to care.

Work to increase access to services for Shetland patients, utilising resources via other NHS Boards, is being progressed to try and optimise access to care in a timely way for the local population. However there are risks associated with the capacity in the tertiary centres to deliver visiting services due to gaps in their workforce, as well as growing concerns around available funding to support visiting services going forward as allocations will be top sliced to support the National Treatment Centres and thus reduce funding previously aligned to support local service delivery.

The continued pressures across all services as a result of increased need, demographic pressures, as well as workforce shortages in specific specialities are highlighted. All of these factors and the move to subnational planning and service delivery may lead to further delays in treatment for patients and challenges with securing an acceptable standard of service for Shetland residents with the consequent potential for both organisational reputational damage as well as patient harm. This risk is currently subject to further review.

**SR06 IG Training NHS Staff**

The current controls for SR06 are considered to be inadequate, this is being considered during the review of SR06 and SR11.

**SR17 IT Failure due to Cyber Attack**

There are multiple layers of technical controls in place including anti-malware, firewalls, intrusion detection, access logging, encryption, web filtering, advanced threat protection, software patching to reduce the risk of a cyber attack.

It is noted that the cyber landscape means that mitigation against the likelihood of an attack is essential but not possible, however, through enhancing security controls,

monitoring and recovery testing it is possible to mitigate against some of the potential consequences of any cyber attack.

The digital team are now managed directly by the Chief Executive with responsibility for this Risk reassigned to the Chief Executive, who has reviewed the risk and reduced the risk rating to 12 reflecting that the likelihood and consequence of this risk occurring has been reduced from Likely and Major (score of 16) to Likely and Possible (may occur occasionally) which has reduced the risk score to 12. This is in accordance with the number of measures in place to minimise the actual risk of failure as a result of any potential attack.

However, the controls remain classified as inadequate due to the inherent high risk nature of this risk through the ever emerging geopolitical desire to cause disruption with an associated potentially high economic opportunity seen by state and criminal actors alike.

### **SR 18 Risk of CBRN Contamination**

Whilst progress has been made in relation to establishing a decontamination response for use as part of the Major Incident plan, a number of gaps remain in the controls eg site for decontamination tent, no budget for training and equipment, no training for Incident managers and the CBRN plan as yet remains untested. Not having an effective CBRN decontamination facility with appropriately trained staff has the potential to impact on a Shetland wide response to a CBRN incident.

The Resilience and Business Continuity Officer is in process of working with partner agencies to develop an Island model of CBRN response. Some progress has been made with addressing the challenges of having a purpose built site available for decontamination purposes.

### **SR20 Risk of Flu, Coronavirus, other Pandemic**

The Director of Public Health has recently reviewed this risk and whilst it has a number of controls in place it is noted that there are either gaps in the controls and/ or areas where further work is required and therefore overall the controls are considered to be inadequate. Local Public Health Teams have participated in the national exercise, Pegasus, which has served to highlight the challenges of caring for individuals with high consequence infectious diseases in remote settings, as well as the difficulty in securing access to appropriate transport for onward transfer of individuals to specialist care facilities.

Where controls are in place, the effectiveness of these are only maintained if appropriate action is taken eg Business Continuity Plans are in place across services but there is a need to ensure that these are reviewed at least on an annual basis and any learning from exercises or responding to real events is then built into the plan for the future. Measures to publicise and highlight the status of BCPs across services are currently being implemented to raise the profile of where there are gaps in the system. Resources are in place to support face fit testing for FFP3 masks and modules for Infection Prevention and Control training (IPC) but there is also a need to ensure compliance with all relevant staff have undergone face fit testing as appropriate for their role and have completed the mandatory training modules. Whilst the Health Protection Team capacity has increased with the appointment of a Consultant in Public Health Medicine, a vaccinator and an admin assistant, the impact of reduced funding upon the Team is still noted.

Further work is required to ensure that:

- lessons learnt from covid pandemic are incorporated into planning;
- Business Continuity planning is consistent, maintained and sustainable;
- current vaccination programme for flu & covid uptake is maximised;
- sufficient health protection capacity to respond, as required;
- IPC knowledge and skills throughout the health and care workforce are maintained.

### **SR 23 Climate Emergency and Net Zero**

The Scottish Government has set a clear framework and legislation for NHS Boards to achieve net zero to reduce the risks from the Climate Emergency.

NHS Shetland recognises the risk in terms of compliance and has a number of mitigations in place, however, there is insufficient capital and revenue availability combined with staffing challenges to ensure compliance in respect of the NHS Scotland standards and ability to achieve net-zero by 2040.

Non compliance with net zero standards poses significant risks to the organisation, including financial penalties, reputational damage, legal non-compliance, and a direct threat to service delivery and patient outcomes. This risk was updated and presented to the ARMG in November for adding to the Strategic Risk Register.

Following re-establishment of the Climate Change and Sustainability Group, the risk has been reviewed at the meeting in February and has been further revised and re-presented to the ARMG meeting in March 2026.

### **SR24 Structural Integrity of GBH**

During investigative work for continued water ingress within multiple areas of GBH, separation of the outer leaf of external blockwork from the inner leaf was noted along with cracking of the external wall faces along the Phase 1 building (Ward 3, Maternity, Renal, Old outpatients, ED and Imaging).

Comprehensive surveying of the wall elevations was undertaken by structural engineers under advice from colleagues at NHS Scotland Assure. This identified that the structural integrity of the outer leaf blockwork had been compromised with the outer walls at risk of partial or complete medium to long-term collapse putting services, staff and public located in, beneath and adjacent to these areas at risk.

A number of controls were put in place and work continues to progress these eg installation of supporting scaffolding and a plan to add additional external supporting structural mesh to stabilise the external walls to prevent further weather induced deterioration, whilst a medium to longterm remedial solution can be implemented.

There is a Programme Board in place for this programme of work, with the strategic risk being reviewed at each monthly Programme Board meeting. The temporary repair works are scheduled to be completed in March 2026, following which a full review of the risk will be undertaken, and a new risk incorporating the additional risk presented as a result of Scottish Government requesting that a permanent solution to the remedial works now be included in a wider medium-term Gilbert Bain Hospital Site Development Plan, rather than being addressed separately thus impacting on the timescale of the temporary repair.

### **SR25 Ageing Estate**

The age of the NHS Shetland estate is a significant contributor to organisational risk, primarily through potential patient and staff safety concerns, service disruptions, and an increasing maintenance backlog liability. Many facilities are considered outdated and not fit for modern healthcare delivery, which has the potential to lead to clinical and financial risks.

As time progresses the risk of multiple contiguous infrastructure failures increases. Capital funding in NHS Scotland is restricted and at the current levels of investment would take over 30 years to rectify the issues that are currently known.

Following the recent Lift Failures within the Gilbert Bain Hospital, requiring the Hospital to operate on a Business Continuity footing, the current risk was updated and presented to the ARMG in March 2026 for consideration.

### **Organisational Risk 1661 Impact of Lift Failure at GBH**

Following issues experienced with both of the lifts in the Gilbert Bain Hospital a new risk has been developed and presented to ARMG in March 2026.

All in-patient facilities in the GBH require lift access in order to support patient access and transfer between departments. Complete failure of the lifts would require a phased hospital evacuation requiring the support of neighbouring hospitals, local emergency planning partners and the Scottish Ambulance Service (SAS) in order to meet patient needs.

A BCP is in place to support the move of patients to the ground floor, and to triage patients for a suitable place of safety and onward transfer. However at this time, there is no BCP in place with SAS or local providers in the event that a controlled evacuation became necessary. In addition, there is currently no business case in place to replace the lifts nor funding to support the project. Without the BCP for service continuity being put in place, the current controls to address this risk do not extend beyond being able to evacuate patients to a ground floor location.

### **Organisational Risk 1535 – Inadequate Reviews of IG Documentation**

The volume of Information Governance and Information Security work continues to outstrip capacity, thus impacting on progress with completing/reviewing Data Privacy Impact Assessments and creating insufficient time available to review all the required IG documentation. Insufficient staff capacity has the potential to cause bottlenecks and delay projects/ improvements from being progressed across the organisation.

It is acknowledged that this risk will remain until the planned restructure of the Information Governance team has been completed.

### **Directorate Risk 1609 - Incorrect Storage of Medical Records**

The controls on this risk were deemed inadequate due to there being no capacity within the medical records team to refile all of the documentation. However, some additional Bank Staff capacity has helped with reducing the level of risk posed by the non-filing of clinical information. However there remains an excess of non-filed clinical information.

## **Directorate Risk 1612 - Medicine Cost Instability**

This risk highlights the challenges to the organisation of external factors such as cost instability, over which we have no control, but which has the potential to impact significantly on medicines budgets with a consequent impact on displacing resources from other planned services to meet these costs. This risk has the potential to be impacted further by the current political situation across the world and thus further price increases are anticipated.

### ➤ **New Risks**

Three new Estates risks noted below have now been added to the Strategic Risk Register. These are

- SR23 replaces Revised SR14: Climate Emergency and Net zero
- SR24 Structural Integrity of Gilbert Bain Hospital
- SR25 NHS Shetland Ageing Estate.

All of these risks were discussed in detail at the ARMG meeting in November and Approved for adding to the Strategic Risk Register. Due to further issues of concern arising these risks have been reviewed at the ARMG in March 2026.

In addition a new Organisational Risk 1661 Impact of Lift Failure at GBH has been developed following issues experienced with both lifts in the Gilbert Bain Hospital. This was discussed at ARMG in March and Approved to be added to the Risk Register

### ➤ **Risks in Development**

Following a commissioned external review of Mental Health Services, which recommended that a Risk be developed and placed on the Strategic Risk Register until such time as there were effective governance systems in place within, and around, the service, the Director of Community Health and Social Care (DCHSC) and Head of Mental Health Services have been working to draft this risk. It is anticipated that this risk will be presented at ARMG in May 2026.

Risks to reflect the ongoing challenges in the local Dental Service are also in development and are expected to be presented to ARMG and CGC at their respective meetings in May/June 2026.

### ➤ **Strategic or Organisational Risks Closed**

Only SR14 Estate was closed in 2025/26.

### ➤ **Risk Appetite**

Following the Board development session held on 21 January 2025 to consider the Board's overall Risk Appetite, the current Risk Appetite was added to each of the Risks. A further development session is necessary in order to review and agree the NHS Board's current Risks and the level of Risk Appetite for each of the risks. This process will be commenced by considering the Board Appetite around Strategic risks SR24 Structural Integrity of Gilbert Bain Hospital and SR25 NHS Shetland Ageing Estate.

### ➤ **Procedures**

No new procedures were considered.

➤ **Clinical Risk Advisory Team (CRAT) Reviews**

A dedicated CRAT meeting slot is in place providing an opportunity weekly to review a range of adverse events arising across health and care services as needed. In the absence of the Medical Director, we have included attendance from the Director of Public Health who is temporarily covering the lead role of organisational Duty of Candour (DoC) decision maker, thus allowing those decisions to be informed by the discussion at CRAT, as well as ensuring that DoC is considered as part of the CRAT process.

➤ **Proposals**

Following migration of the Community Health and Social Care Partnership Directorate Risk Register on to JCAD in 2022, a number of issues were experienced with access to the system. Access to the JCAD system has continued to be an issue for the Clinical Governance and Risk Team.

Despite escalation of these access issues to the Director of Community Health and Social Care, with additional support provided from the Planning, Performance and Projects Officer, IT support services and JCAD nationally, no resolution to date has been found.

This issue was discussed at the RMG meeting in September and the Director of Community Health and Social Care noted that they wished to continue to use the JCAD system for the Directorate level risks and proposed that the upcoming review of both the Local Authority and NHS Risk Management Strategies may provide an opportunity to review how the risk registers interface with one another across the 2 systems currently in use. There may also be potential opportunities for better integration when the NHS moves forward with the implementation of Healthcare Guardian (InPhase) in 2026.

In addition it has been agreed to commence a rolling programme of review of these risks via the CHSCP Strategic Meeting where both the Local Authority Risk Manager and Chief Nurse (Corporate) are part of the membership of the group.

A copy of the current JCAD Risk Register is included for information, see Appendix 4.

**Healthcare Guardian**

The business case for Healthcare Guardian, formerly known as In Phase, was Approved by the RMG at it's meeting in September 2025. The sign off contract was completed on the 27 October and a local Programme Board / Project Team has been established. An initial 'kick off' meeting was held on 23 February 2026 and an outline implementation plan shared. We await confirmation from Ideagen as to what project resources they can commit, over what period of time, to be able to develop a full implementation plan. Project management from NHS Shetland is being provided by the Digital Projects Team Leader with support from Chief Nurse (Corporate).

This product will provide a single Corporate solution to oversight of healthcare governance covering assurance, safety and improvement. Apps on Adverse Event Incident and Risk Management, Complaints handling, Patient Feedback and FOI management are all core functions of the product, additional functionality can also be purchased.

## ➤ **Horizon Scanning Risk Discussions**

The following areas have been given due consideration as to their potential future impact on the organisation:

Estates Risk – Whilst 3 separate risks have now been drafted, it is noted that the risk pertaining to the Structural Integrity of the Gilbert Bain Hospital (GBH) will remain an area of concern for the organisation, with the potential to significantly impact on the continuity of the delivery of high quality, safe care should there become a need to urgently decant services from the GBH site. A relevant Business Continuity Plan is in development. This risk will be kept under regular review at each ARMG meeting.

In addition, a further Estates risk related specifically to the lifts on the GBH site has been drafted following service failure issues in the last quarter of the financial year.

Escalating external factors – This risk is already one of the highest risks for NHS Shetland, with a very high risk rating of 20. Recent developments on an international front, including the war in Israel, has the potential to impact further on the realisation of this risk and therefore it will be kept under regular review. Dedicated time may be spent at the next ARMG undertaking a comprehensive review of this risk should there be any further escalation of the situation in the Middle East.

Access issues – Discussion was held regarding the increasing challenge being presented by access issues across the organisation. It was noted that whilst access issues were being raised, there were different challenges across the services eg access issues in terms of waiting times for planned care & diagnostics, service access issues in healthcare specialities across Scotland, local access issues due to capacity and workforce challenges as well as public expectation, eg dental, primary care, psychological therapies and the potential for further access issues to arise based on future subnational service planning and delivery. It was agreed that a short life working group be established to review the range of 'access issues' to better understand the overall position and establish if we need to create a new risk around access.

### **2.3.1 Quality/ Patient Care**

Effective risk management is a key component of ensuring patient safety by contributing to improving the reliability and safety of everyday health care systems and processes.

### **2.3.2 Workforce**

Effective management of risk is key to ensuring staff work in a safe environment. The risk assessments recorded on Datix have universal application across NHS Shetland, other NHS Boards as well as including staff working within the Community Health and Social Care Partnership, and as a consequence, affect all groups.

Due to changes in the Clinical Governance and Risk Team, with staff turnover and vacancies in the team, the work to review all of the risks in relation to the organisational Risk Appetite and to review actions to close any gaps in controls will be delayed but is being progressed as time and capacity allows.

### **2.3.3 Financial**

There are no direct financial consequences of this paper. However, where improvements in practice, or to address gaps in controls, are required there may be associated financial costs. These are managed through the department/area either where the issue arose or by those responding to the issue eg health and safety, estates dept or would be escalated if it was a significant cost.

#### **2.3.4 Risk Assessment/Management**

The Executive Director reviews their strategic risks prior to each ARMG and the full strategic risk register is presented at each ARMG meeting. If new strategic risks are identified these are also included at ARMG for review and agreement to be included on the risk register.

The Standing Committee's aligned Risk Registers are presented at each meeting of the respective Committee.

Risk Assessment and Management is undertaken in line with Healthcare Improvement Scotland (HIS) Risk Management Framework which incorporates the NHS Scotland 5x5 Risk Assessment Matrix. A new Risk Management Matrix will be implemented as part of the local adoption of the 'A national framework for reviewing and learning from adverse events in Scotland' (Healthcare Improvement Scotland, Feb 2025).

It is evident that the current risk environment is becoming more challenging with external issues impacting upon the organisation's ability to continue to manage these risks effectively eg in relation to managing access to services and maintaining our estate in increasingly difficult financial and workforce conditions. This is unlikely to improve in the short to medium term.

Following the Board development session on 21 January 2025 to consider the Board's overall Risk Appetite, the current Risk Appetite has been added to each of the Risks. A further development session is required in order to discuss and agree the NHS Board's current risks and agreed level of Risk Appetite for each of the Risks.

#### **2.3.5 Equality and Diversity, including health inequalities**

The Board is committed to managing exposure to risk and thereby protecting the health, safety and welfare of everyone - whatever their race, gender, disability, age, work pattern, sexual orientation, transgender, religion or beliefs - who provides or receives a service to/from NHS Shetland.

The Equality and Diversity Impact Assessment Tool has been completed for the current Risk Management Strategy.

#### **2.3.6 Other impacts**

There are no other impacts to note.

#### **2.3.7 Communication, involvement, engagement and consultation**

The SRR is an internal document therefore no engagement with external stakeholders has been undertaken. There has been regular communication and involvement in the development and review of the risks with Heads of Departments, relevant topic specialists eg Health and Safety, and with the Executive Directors both on an individual level and corporately when formally meeting as ARMG. ARMG meetings have been held quarterly as per business schedule.

#### **2.3.8 Route to the Meeting**

The Strategic Risk Register has been considered by RMG at its meeting held on 11 June, 17 September, 12 November and 18 March 2026. Risk Management Group was formally renamed Audit and Risk Management Group (ARMG) from November 2025.

Committee aligned risks have also been considered at each of the Standing Committees over the year April 2025 to March 2026. Any Amendments or actions proposed at each meeting has been followed up either by the respective Director or by the Chief Nurse (Corporate) and/or Clinical Governance and Risk Team as appropriate.

This report provides details of the Strategic Risks and illustrates that the Strategic Risk Register is now being kept under regular review. As noted the Clinical Governance and Risk Team will support Managers to review in entirety the content of all risks held on their Risk Registers to ensure that these are updated and remain current going forward.

This report comprises information that has been reviewed and updated by the Executive Directors and Risk Leads/Action Owners. The ARMG receives the Strategic Risk Register report at each meeting.

Challenges have been noted, however, in that the mitigations and controls on some risks are overdue for review. Clinical Governance and Risk Team members will continue to focus on supporting Managers to review in entirety the content of all risks held on their Risk Register.

It is also noted that the current risk environment is becoming increasingly more challenging with external issues impacting upon the organisation's ability to continue to manage these risks effectively eg in relation to managing access to services and maintaining our estate in increasingly difficult financial and workforce conditions. This is unlikely to improve in the short to medium term, and potentially will have long term impact on the organisation.

## **2.4 Recommendation**

The Strategic Risk Register is formally reported to the NHS Board for

- Awareness and
- Decision

to provide assurance that the strategic risks are being managed.

The NHS Board is asked to note the status of the Strategic Risk Register, reviewing, amending or, confirming that the strategic risks are being managed.

The NHS Board are also asked to consider if there are any new Strategic risks that should be added to the Register.

## **3 List of appendices**

The following appendices are included with this report:

- Appendix No1, Overview of Strategic Risks by Highest Ranked 2025/2026
- Appendix No 2, Strategic Risk Register
- Appendix No 3, JCAD Directorate Risk Register and Risk Matrix

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1648 Structural Integrity of GBH</b>		<b>Strategic ID: SR24</b>	
<b>Risk Description:</b> <b>IF:</b> The external building envelope continues to degrade unchecked. <b>THEN:</b> The external walls of the building could further separate from the inner walls and structural columns. <b>RESULTING IN:</b> Immediate decanting of affected and adjacent areas leading to loss of over half the capacity and function of the acute hospital site.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>	<b>Risk Appetite -</b>  To be confirmed		
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Clinical Governance Committee (CGC), Finance and Performance Committee (FPC)	
<b>Likelihood:</b> Likely - Strong possibility that this could occur, likely to occur	<b>Consequence:</b>  Extreme	<b>Current Risk Level &amp; Rating:</b> Very High Risk <b>20</b>	<b>Risk Owner &amp; Review Date:</b> Chittick, Brian <b>30 Apr 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Supporting scaffolding and crash deck installed to protect areas below from a catastrophic collapse.</li> <li>Temporary external supporting structural mesh to be installed to stabilise external walls whilst medium to long-term remedial solution can be implemented and to prevent further weather induced deterioration.</li> <li>Specialist design team established to design, plan, procure and deliver remedial works.</li> <li>SG support, both financial and technical agreed to support design solution.</li> <li>Internal NHS Shetland resource in place to support technical and clinical decision making.</li> <li>Programme Board and internal governance structure put in place to monitor progress.</li> <li>External and internal Project Team established to progress the GBH Site Development Plan and Whole System Infrastructure Plan workstreams</li> </ul>			
<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>On-going delay in installing temporary supporting structure due to difficulty to design/ install leading to funding uncertainty within FY25-26 and 26-27.</li> <li>Need to develop emergency Business Continuity Plans if areas need to undergo immediate decanting due to any structural shift.</li> <li>Complex remedial works programme with many co-dependencies.</li> <li>Extents of technical compliance for decanted accommodation defined by SG/ NHSS Assure/ regulation adding to complexity, timescales and potential cost.</li> <li>NHS Shetland been asked to include the permanent remedial solutions into a wider Gilbert Bain Site Development Plan for inclusion in the Board's medium to long-term Whole System Infrastructure Plan to be submitted to SG by March 2027 in the form of a Strategic Assessment.</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Through the above process it could be 2031/2032 at the earliest before a definitive remedial solution to the structural issues is deployed.
- The temporary structural mesh has a requirement for on-going maintenance and inspection and is only certified for up to 5 years. The costs associated with any of this work were to be included as part of the Board's 5-year Business Continuity Plan with funding not guaranteed from SG to Adequate Terminate x Inadequate Tolerate No controls Transfer x Treat (must have Actions added below) support this, thus creating an on-going and escalated risk over time. SG have since requested this isn't included so currently no financial pathway for any on-going liabilities.
- Concurrent building infrastructure risks (known and unknown) which may materialise during intervening period.

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** **Inadequate**

**Risk Rationale/Comments:** Chittick, Brian reviewed this risk in 05 Nov 2025

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1307 External Factors eg. Brexit/Supply Chain</b>		<b>Strategic ID: SR04 (1307)</b>	
<b>Risk Description:</b> <b>IF:</b> If external factors such as political instability, global conflict, digital revolution (AI) or national policy changes impact <b>THEN:</b> across the wider global/UK/local economy THEN there could be resource implications like increased energy/food costs, medical supply constraints, inadequate housing stock and decreased appropriately trained workforce availability <b>RESULTING IN:</b> Impact on the Boards ability to sustain services particularly in the areas of patient care, workforce planning and performance of budgets.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> <li>To provide best value for resources and deliver financial balance.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<b>Risk Appetite - Moderate (2 - Cautious)</b>  NHS Shetland is willing to accept a level of risk to innovate and adapt, but priority remains on ensuring patient safety and meeting regulatory standards.	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Finance and Performance Committee (FPC)	
<b>Likelihood:</b> Almost certain - Expected to occur frequently, more likely to occur than not	<b>Consequence:</b> Major	<b>Current Risk Level &amp; Rating:</b> Very High Risk <b>20</b>	<b>Risk Owner &amp; Review Date:</b> Chittick, Brian <b>31 Jan 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Establishment of contract manager to align contract management with current strategic environment</li> <li>Establishment of a financial Recovery and Sustainability Group to keep a watching brief on external influences on NHS Shetland sustainability</li> <li>Liaise with Scottish Government on required actions / national work and regional work</li> <li>Maintaining links with National &amp; local resilience teams to update plans</li> <li>Strong links to fora like Scottish Resilience Partnership and Regional Resilience Partnership to help identify and mitigate risk</li> <li>Accommodation and Capital Assets Review complete to ascertain housing requirements moving forward</li> <li>Workforce Planning underway</li> <li>Innovation in recruitment and retention to mitigate post Brexit workforce challenges especially in grow you own</li> <li>Board prioritisation to mitigate Cyber security risk and impact of rogue actors with additional IT resource and training and learning for staff (eg cyber tests)</li> <li>Sustainment of Medicines Procurement Manager post</li> </ul>			
<b>Gaps in Controls</b>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Current controls appear to have mitigated the initial phase of the end of the transition period. However controls must be maintained to ensure further developments do not place NHS Shetland at risk of disrupting care
- Increased costs due to the impact of leaving the single market and global supply chain are evident and increasing and these cannot be mitigated

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

Yes - Some controls have been tested

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** Adequate

**Risk Rationale/Comments:** Chittick, Brian reviewed this risk in 31 Oct 2025

Likelihood is being realised at present especially in a post-Brexit operating environment where things like medicines availability are current challenges being navigated at present times.

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1263 Access to Services</b>		<b>Strategic ID: SR13 (1263)</b>	
<b>Risk Description:</b> <b>IF:</b> If there are significant gaps due to recruitment, retention or funding <b>THEN:</b> Then there will be access problems for those living in more remote areas and/ or to specific specialities <b>RESULTING IN:</b> resulting in delays in treatment and associated mortality and morbidity and a widening in the inequality gap			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> <li>To provide best value for resources and deliver financial balance.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>	<b>Risk Appetite - High (3 - Open)</b>  Entered BC and open to changes to deliver effective services		
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> CHP Management Team Clinical Governance Committee (CGC) Finance and Performance Committee (FPC)	
<b>Likelihood:</b> Likely - Strong possibility that this could occur, likely to occur	<b>Consequence:</b> Major	<b>Current Risk Level &amp; Rating:</b> High risk <b>16</b>	<b>Risk Owner &amp; Review Date:</b> Robinson, Ms Jo <b>31 Jul 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Primary Care escalation plan to move to urgent appts so those who need to see a GP will be prioritised</li> <li>Better anticipatory care planning especially for high resource individuals</li> <li>MDT workstream to allow individuals to see right professional earlier, including First point of contact physiotherapists and Advanced Nurse practitioners</li> <li>Detailed monitoring of Long Term Condition checks now possible through SHIP</li> <li>Use of Attend Anywhere Video conferencing facility is providing improved access</li> <li>Models for health and social integration focus on ensuring locality resilience and sustainability. Primary healthcare continues to be provided in existing localities.</li> <li>Outreach for care at home provided through existing care centres.</li> <li>Ambulance Liaison Group well established to ensure risks identified and acted on for all ambulance issues across Shetland. Joint work in progress with Scottish Ambulance Service using the Strategic Options Framework implementation plan, with priority given to actions for remote areas. For appointments in Lerwick, there is good understanding of the need to be flexible with appointment times.</li> <li>Review of Urgent Care Pathways to decrease footfall in A&amp;E involves use of NHS Inform/Flow</li> <li>Use of Ask My GP available in some health centres pending new technological developments</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>Level of influence on infrastructure planning.</li> <li>Understanding unmet need- where someone does not access a service</li> </ul>	
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)	
<b>Have the Controls Been Tested</b> No - No controls have been tested	<b>Analysis and Findings of Control Testing</b>
<b>Adequacy of Controls:</b> <span style="color: green;">Adequate</span>	
<b>Risk Rationale/Comments:</b> Robinson, Ms Jo reviewed this risk in 08 Apr 2026  Although the GP workforce is significantly more stable than it has been, there is a vulnerability in nursing provision to non doctor islands, due to the difficulty in recruiting to posts and maintaining nursing skills in remote settings. Alternative models have been developed in order to sustain input into these communities.	

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1444 IG Training NHS Staff</b>		<b>Strategic ID: SR06 (1444)</b>	
<b>Risk Description:</b> <b>IF:</b> If there are low levels of compliance with mandatory IG training <b>THEN:</b> Then there is a risk of a greater number of data incidents as a consequence of low levels of information governance awareness and knowledge. This will also be of concern to regulators (such as the ICO). <b>RESULTING IN:</b> Resulting in harm to patients and/or regulatory action and/or financial penalty and/or reputational damage to the Board			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To provide best value for resources and deliver financial balance.</li> </ul>		<b>Risk Appetite - Low (1 - Minimal)</b> The low level of compliance has been raised by internal and external audit as a priority action. In addition, the ICO has emphasised the need to evidence the delivery of adequate and effective information governance training as requirement of data protection legislation (GDPR/DPA 2018).	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Digital Governance Group (DGG), Finance and Performance Committee (FPC), Information Governance Group (IGG), Staff Governance Committee (SG)	
<b>Likelihood:</b> Likely - Strong possibility that this could occur, likely to occur	<b>Consequence:</b> Major	<b>Current Risk Level &amp; Rating:</b> High risk 16	<b>Risk Owner &amp; Review Date:</b> Marsland, Mr Colin <b>28 Feb 2026</b> <b>(currently under review)</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Information Governance is part of the Board mandatory training courses that staff should complete at commencement of employment and retake in-line with agreed refresher period in Board's plan.</li> <li>In the annual staff review process line managers should be ensuring that staff that directly report to them are compliant with their statutory and mandatory training.</li> <li>Information Governance team are producing reports for Directors and line managers that highlight staff compliance against this mandatory training course.</li> <li>NHS Shetland has introduced an escalation procedure that can result in non-compliant staff being barred from accessing the network.</li> </ul>			
<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>The Board's performance on staff training on information governance is actively being managed with reports produced for Board Governance Committee and EMT.</li> <li>TURAS Learn also has line management reports that can be used as a routine tool to check staff progress in this mandatory course and all the other courses</li> </ul>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> No - No controls have been tested		<b>Analysis and Findings of Control Testing</b>	
<b>Adequacy of Controls:</b> <b>Inadequate</b>			
<b>Risk Rationale/Comments:</b> Marsland, Mr Colin reviewed this risk in 03 Dec 2025			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating $\geq 15$ )

Risk score unchanged. As of 31 January 2025, the compliance rate is 81%. This rate (and the November compliance rate of 70%) is the Turas reported rate for the NHS Shetland mandatory IG training module. The previously reported lower compliance rates factored in the training status of bank and contractor staff. Overall organisational compliance with 'IG training' is likely to be less than the reported Turas rate.

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1649 NHS Shetland Ageing Estate</b>		<b>Strategic ID: SR25</b>	
<p><b>Risk Description:</b>  <b>IF: THEN:</b> Critical unplanned facility or infrastructure failure(s) would lead to significant service pressures or reduction; The timescales for remediation would be extended due cost uncertainty, availability of resource and lead-times for design, procurement and execution; Services or whole facilities would end up on a Business Continuity footing for an undetermined period of time; Pressures on other parts of the service to provide mutual aid. <b>RESULTING IN:</b> Inability to develop additional treatment pathways and capacity; Patients have fragmented pathways; Inefficiencies in flow; Potential disruption to service delivery by closure of areas or facilities;                      Financial risks due to unplanned failures; Reputational Risk;                      Harm to patients and staff; IPC issues; Health, Safety and wellbeing issues; Loss of critical services supplies or infrastructure; Unable to acquire regulatory compliance.</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<p><b>Risk Appetite -</b></p>	
<p><b>Risk Response:</b>                      Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b>                      Clinical Governance Committee (CGC)                      Finance and Performance Committee (FPC)</p>	
<p><b>Likelihood:</b>                      Likely - Strong possibility that this could occur, likely to occur</p>	<p><b>Consequence:</b>                      Major</p>	<p><b>Current Risk Level &amp; Rating:</b>                      High risk  <b>16</b></p>	<p><b>Risk Owner &amp; Review Date:</b>                      Chittick, Brian  <b>12 Jun 2026</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>Continuing to work with SG where able when extra capital funding is provided to remove all high-risk backlog maintenance.</li> <li>Following approval of parts of the Business Continuity Infrastructure Plan (BCIP), Scottish Government have now allocated backlog capital maintenance funding based on the risk priorities identified in the plan. This funding is provided on a year-by-year basis only.</li> <li>Discussions continue with Scottish Government and within NHS Shetland on managing the existing risks and the ability to highlight emerging risks that may require funding. Bi annual full submission of BCIP with intervening years by exception.</li> <li>Capital and Asset Management Group and individual Estates Safety groups to monitor emerging risks and prioritise and escalate as required.</li> </ul>			
<p><b>Gaps in Controls</b></p> <ul style="list-style-type: none"> <li>Service, building and system Business Continuity Plans will need revision and co-ordination to mitigate potential scenarios.</li> <li>Whilst reasonable knowledge and intelligence is held about a significant proportion of the critical infrastructure and services, information gaps around the wider built environment exist across the whole estate.</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Multi-year planning and phased approach to infrastructure works is prohibited by the single year financial funding strategy.
- Lack of capacity within systems and buildings to allow decant of services to alternative locations either in planned way for coordinated remedial works or in emergency situations.
- Negligible BCP backlog funding is being provided by SG for financial year 2026-2027 so full reliance on formula capital to support time-sensitive backlog issues.

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** **Inadequate**

**Risk Rationale/Comments:** Chittick, Brian reviewed this risk in 12 Nov 2025

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1515 IT Failure Due to Cyber Attack</b>		<b>Strategic ID: SR17 (1515)</b>	
<b>Risk Description:</b>			
<p><b>IF:</b> If a malicious actor or orchestrated cyber attack occurs <b>THEN:</b> Then NHS Shetland could experience system downtime, theft, modification or loss of data and/or data disclosure. <b>RESULTING IN:</b> Resulting in disruption to clinical services and patient information integrity that could compromise patient care and confidentiality through data theft, system downtime, delays in treatment, risk to public reputation and significant financial costs.</p>			
<b>Organisation Objectives</b>		<b>Risk Appetite - None (0 - Avoid)</b>	
<ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> <li>To provide best value for resources and deliver financial balance.</li> </ul>		<p>Use of digital technology is inherently high risk due to (1) geopolitical desire to cause disruption (2) potential high economic opportunity as seen by state and criminal actors.</p> <p>Services cannot be delivered without digital technology so the only viable risk management approach is robust mitigation resourcing.</p>	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Audit Committee (AC) Finance and Performance Committee (FPC) Information Governance Group (IGG)	
<b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions	<b>Consequence:</b> Major	<b>Current Risk Level &amp; Rating:</b> High risk <b>12</b>	<b>Risk Owner &amp; Review Date:</b> Chittick, Brian <b>31 Jan 2026</b>
<b>Controls</b>			
<ul style="list-style-type: none"> <li>Multiple layers of technical controls in place including anti-malware, firewalls, intrusion detection, access logging, encryption, web filtering, advanced threat protection, software patching.</li> <li>Information Governance and Information Security policies are in place and available to staff.</li> <li>New Information Governance and Digital Security Framework being developed to bring together all IG and Digital Security strategies, policies and procedures.</li> <li>New suite of 10 digital security policies are complete and will go through approval process by end August 2021.</li> <li>Cyber awareness training for staff, regular communications on cyber awareness</li> <li>NHS Shetland regularly audited against cyber security by internal audit, external audit and Scottish Government. These audits are against the Network and Information Systems Regulations 2018.</li> <li>Full NIS Audit (Year 4) conducted in 2023</li> <li>Subsequent NIS audit in 2024 showing significant compliance improvement</li> <li>Third party cybersecurity register implemented</li> <li>Regular sharing of learning from different private and public sector organisations</li> <li>Timely Windows 11 updates</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>Cybersecurity protection opportunities and assets are not being fully utilised due to limitations of staff resource</li> <li>Staff compliance with mandatory training is low (and trending down)</li> </ul>	
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)	
<b>Have the Controls Been Tested</b> Yes - Some controls have been tested	<b>Analysis and Findings of Control Testing</b>
<b>Adequacy of Controls:</b> <span style="color: red;">Inadequate</span>	
<b>Risk Rationale/Comments:</b> Chittick, Brian reviewed this risk in 31 Oct 2025  The cyber landscape means that mitigation against likelihood is essential not possible.  By further developing security controls, monitoring and recovery testing we can mitigate against Consequence	

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1594 Risk of flu, coronavirus, other pandemic</b>		<b>Strategic ID: SR20 (1594)</b>	
<p><b>Risk Description:</b>  <b>IF:</b> there is a pandemic due to a new or mutated virus <b>THEN:</b> health services will be significantly impacted and could be overwhelmed due to increased demand directly due to the pandemic causing excess morbidity and mortality; reduced staffing capacity due to sickness and absence; reduced capacity in other services [pandemic risk] <b>RESULTING IN:</b> poorer outcomes for patients and families; impacts on staff health and wellbeing; financial cost; and reputational impact if not managed well.</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<p><b>Risk Appetite - Low (1 - Minimal)</b></p> <p>Very difficult to eliminate all risk because of unpredictable nature of risk and external factors.</p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Control of Infection Committee (COIC)</p>	
<p><b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions</p>	<p><b>Consequence:</b> Major</p>	<p><b>Current Risk Level &amp; Rating:</b> High risk <b>12</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Laidlaw, Dr Susan <b>30 Jun 2026</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>National and local surveillance systems including lab reporting, use of HPzone.</li> <li>Business Continuity Plans in place for most depts but need reviewing and exercising</li> <li>FFP3 mask fitting programme</li> <li>Mandatory IPC training</li> <li>Increased IPCT capacity including a remit for care homes</li> <li>Dedicated vaccination team and centre, with systems in place to try and maximise uptake.</li> <li>Increased HPT capacity with some surge capacity in public health</li> <li>Assurance process in place for care homes</li> <li>Increased public awareness of hand and respiratory hygiene and what to do if have respiratory systems</li> <li>Experience of public comms during a pandemic</li> <li>Experience of reconfiguration of services and redeployment of staff for pandemic response</li> <li>Experience of rapid deployment of mass vaccination centres; and mass testing during last pandemic</li> <li>Experience of standing up a Pandemic response team and associated reporting and structures</li> <li>Mass fatalities plan</li> <li>H &amp; I pandemic plan revised</li> <li>Engagement with national bodies including Public Health Scotland and ARHAI (for example three meetings a week with PHS and Board HPT colleagues )</li> <li>Experience of holding local PAGS and IMTs</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Higher uptake rates for flu and covid vaccination than Scottish average for all cohorts.

### Gaps in Controls

- Business continuity plans - need to ensure these are reviewed on an annual basis and exercised, and reviewed in light of lessons learnt from exercises / testing and real scenarios.
- FFP3 face fit testing - need assurance that everyone staff member who may need to use a FFP3 is tested, and retested at 3 yearly intervals.
- Mandatory IPC training - need assurance that everyone is completing the relevant IPC training for their role, and renewing at the required intervals
- Uptake of flu and covid vaccination should be increased - especially amongst staff - where it has been dropping off
- Health protection team capacity although increased, is still fragile with two part time nurses. We have filled vacancies for consultant, admin and vaccinator, ,
- Lessons learnt from covid pandemic need to be incorporated into local pandemic planning process.
- New winter planning format not yet tested
- Await feedback from UK Exercise Pegasus to inform pandemic planning

### Robustness of testing the controls recorded: (added 26<sup>th</sup> April 2023)

#### Have the Controls Been Tested

Yes - Some controls have been tested

#### Analysis and Findings of Control Testing

Eg - HPT response to care home outbreaks. Although efficient in dealing with small outbreaks, HPT, IPCT and testing capacity could be overwhelmed with a large outbreak. Organisation of testing and prophylaxis / treatment, especially out of hours can be problematic.

### Adequacy of Controls: **Inadequate**

**Risk Rationale/Comments:** Laidlaw, Dr Susan reviewed this risk in 08 Apr 2026

Further work required to ensure :

- Lessons learnt from covid pandemic are incorporated into planning
- BC planning is consistent, maintained and sustainable
- Current vaccination programme (flu, covid) uptake is maximised
- Sufficient health protection capacity to respond
- IPC knowledge and skills are maintained

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1647 Climate Emergency and Net Zero</b>		<b>Strategic ID: SR23</b>	
<b>Risk Description:</b> <b>IF:</b> NHS Shetland fails to meet environmental targets, including net zero by 2040 and a 75% GHG reduction by 2030 <b>THEN:</b> Poses significant risks, including financial penalties, reputational damage, legal non-compliance, and a direct threat to service delivery and patient outcome. <b>RESULTING IN:</b> NHS Shetland would be subject to increased costs, potential sanctions and contribute to the wider climate emergency should it fail to act.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.,</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.,</li> <li>To provide best value for resources and deliver financial balance.</li> </ul>		<b>Risk Appetite - Moderate (2 - Cautious)</b>	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Clinical Governance Committee (CGC), Finance and Performance Committee (FPC)	
<b>Likelihood:</b> Likely - Strong possibility that this could occur, likely to occur	<b>Consequence:</b> Moderate	<b>Current Risk Level &amp; Rating:</b> High risk <b>12</b>	<b>Risk Owner &amp; Review Date:</b> Chittick, Brian <b>30 Jun 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Board ensuring ongoing discussion takes place with Scottish Government and NHS Scotland Assure and support provided</li> <li>NHS Shetland has developed a net zero plan to reflect the targets set by Scottish Government (Net Zero 2040)</li> <li>Board contributes to the Shetland Partnership Climate Change Strategy</li> <li>Board supports the development of SCART tool within available resources</li> <li>Board supports input into EAMS tool within available resources</li> <li>Board supports input EMS tool within available resources</li> <li>Board supports the reporting schedule as set out by SG</li> <li>Regular reporting to Board on key environmental targets and compliance issues</li> </ul>			
<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>No clear strategic direction or oversight, workplan and resource allocation to drive compliance and travel towards net zero.</li> <li>Failure to meet targets could result in significant fines and legal penalties for non-compliance with environmental laws and the Climate Change (Scotland) Act.</li> <li>Missed opportunities for cost savings through energy efficiency measures, leading to higher operational costs, especially given rising energy prices.</li> <li>Potential loss of specific funding or grants provided by the government for sustainability initiatives.</li> <li>Climate change itself poses a major risk to health infrastructure (hospitals, clinics, etc.) through extreme weather events.</li> <li>Without proper adaptation and decarbonisation, the physical healthcare estate may not be able to deliver high-quality, uninterrupted care in a changing climate, making buildings a weak link in the system.</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Increased pressure on services due to climate-related health issues (e.g., heat-related illnesses, spread of certain diseases).
- Risk of not having the necessary workforce capacity, funding, or technology to implement required changes.
- Failure to integrate sustainability into core strategic planning could limit future options for the Board and prevent the delivery of sustained strategic approaches to meet population health needs.
- The risk of using outdated or inefficient equipment and processes due to a lack of investment in low-carbon alternatives.
- Erosion of public confidence in NHS Shetland's commitment to health and wellbeing if it fails to address the climate crisis, which is a significant health threat.
- Damage to reputation could affect the ability to attract and retain talent, as employees increasingly seek alignment with their values.
- Loss of trust from partners, stakeholders, and the Scottish Government, who have set the national policy direction for net zero.

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** **Inadequate**

**Risk Rationale/Comments:** Chittick, Brian reviewed this risk in 05 Nov 2025

NHS Shetland recognises the risks in terms of compliance and have a number of mitigations in place however there is insufficient capital and revenue availability and staff resources availability to ensure compliance in respect of NHS Scotland standards and achieving net-zero by 2040.

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1252 National Standards</b>		<b>Strategic ID: SR01 (1252)</b>	
<p><b>Risk Description:</b>  <b>IF:</b> We have excessively long waiting times and/or poor access to services <b>THEN:</b> This could lead to the potential of poorer patient outcomes as a result in delays in assessment of treatment <b>RESULTING IN:</b> Loss of confidence in the organisation as a provider of safe health and care (including negative publicity)</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> </ul>		<p><b>Risk Appetite - High (3 - Open)</b></p> <p>We need to consider safe, innovative ways of developing services to ensure that we can deliver both access targets and evidence based practice. There are various ways in which we can do this if we take a longer term view on the workforce and creating sustainable service options. Hence, accepting there needs to be some tolerance of this risk in the medium term, but ensuring we mitigate harmful long waits for treatment wherever possible.</p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Clinical Governance Committee (CGC), Finance and Performance Committee (FPC)</p>	
<p><b>Likelihood:</b> Likely - Strong possibility that this could occur, likely to occur</p>	<p><b>Consequence:</b> Moderate</p>	<p><b>Current Risk Level &amp; Rating:</b> High risk <b>12</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Carolan, Kathleen <b>28 Feb 2026</b> <b>(currently under review)</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>As a result of introducing tests of change with Boards who are providing NECU support we have reduced some of our reliance on the independent sector. Access has improved to some specialities and we have reduced the number of patients with long waits ie over 52 weeks</li> <li>Performance management strategy in place. Active management of lists and clinics. Weekly waiting times meeting to review and manage performance. Reporting to each Board meeting and a deeper dive discussion at the Finance and Performance Committee. Close scrutiny by SGHD and monthly ISD reporting on performance to organisation. Ongoing discussions with off island providers.</li> <li>Annual commissioning discussions with NHSG take place and monthly meetings with the Access Support Team (AST) at SG are now in place to discuss planned capacity, risks and joint pathways with the SG team, NHS Shetland and other partners eg NHSG or GJNH where applicable.</li> <li>Discussion about changes and challenges in relation to elective service provision is taking place with the public through various listening exercises included those aligned to the programme initial agreement engagement activities.</li> <li>Waiting times performance is monitored on an ongoing basis and where there are longer waiting times then recovery plans are put in place (if funding is made available to support them).</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Target breach analysis for cancer care (which is high priority) is undertaken whenever a patient waits longer than 31 days or 62 days for cancer access targets. This is undertaken in conjunction with NHSG and other partners as needed.
- Access targets and trajectories set for the Annual Delivery Plan 2025-26 and draft submitted in January 2025 to SG. Access target performance and achievement of trajectories submitted to SG weekly and monthly.
- CsFD and elective care programme improvement ideas are being rolled out locally e.g. patient initiated follow up and opt in services (in line with realistic medicine principles).
- Repatriation programme moved to phase 2 - identifying opportunities to streamline pathways and reduce unnecessary demand for services e.g. via the NECU programme and reviewing patients referred to NHSG for surveillance.
- Audits of patient outcomes are shared within the clinical governance framework eg via the Cancer Lead Team to understand the quality of services and outcomes for patients.

### Gaps in Controls

- Service Level Agreement (SLA) annual review with NHS Grampian is incomplete (mutual sign off, completion of the quality framework and KPIs to monitor the effectiveness of the commissioning process).
- There are some risks associated with the review of shared pathways and consideration of alternative models e.g. resilience, logistics, person centred care.
- Growing concerns around funding to support visiting services as SG allocations will be top sliced to support national treatment centres which will reduce funding previously aligned to local service delivery.
- There are some risks associated with capacity in the tertiary centres to deliver visiting services due to gaps in the workforce e.g. OOHs medical imaging, dermatology, max fax etc. This is a worsening picture with TTG breaches starting to be identified in some surgical specialities i.e. ophthalmology, ENT, Max fax, rheumatology.

### Robustness of testing the controls recorded: (added 26<sup>th</sup> April 2023)

#### Have the Controls Been Tested

No - No controls have been tested

#### Analysis and Findings of Control Testing

### Adequacy of Controls: **Inadequate**

**Risk Rationale/Comments:** Carolan, Kathleen reviewed this risk in 07 Nov 2025

Continued fragility in specialist planned care services, particularly those that are delivered by tertiary providers and/or the independent sector.

# NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1451 IG Training Non NHS Staff</b>		<b>Strategic ID: SR11 (1451)</b>	
<b>Risk Description:</b> <b>IF:</b> If there are low levels of appropriate IG training for staff not employed by NHS Shetland <b>THEN:</b> Then inadequately trained people will have access to NHS Shetland systems and this could increase the number and severity of personal data breaches. <b>RESULTING IN:</b> Resulting in a risk of harm to patients and/or staff, reputational damage, legal action and financial penalty.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide best value for resources and deliver financial balance.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<b>Risk Appetite - None (0 - Avoid)</b>  Statutory obligations in respect of information governance and confidentiality to uphold for organisation reputation. In determining organisations corporate response to meeting statutory obligation the Information Commissioner Office place a high emphasis on effective staff training and regular refreshers in their reviews.	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Digital Governance Group (DGG), Finance and Performance Committee (FPC), Information Governance Group (IGG), Staff Governance Committee (SG)	
<b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions	<b>Consequence:</b> Major	<b>Current Risk Level &amp; Rating:</b> High risk <b>12</b>	<b>Risk Owner &amp; Review Date:</b> Marsland, Mr Colin <b>28 Feb 2026</b> <b>(currently under review)</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Line manager engaging external individuals is responsible for ensuring locums and other temporary staff have adequate, equivalent training in information governance before commencement and ensuring that local induction for these individuals highlights roles and responsibilities for information governance. If the appointing manager is not adequately assured of this training, they should ensure, during induction, that the Board's mandatory information governance course is undertaken and appropriate policies brought to their attention.</li> <li>External parties engaged through a procurement process prior to a contract being awarded should ensure the information governance standards are built in to the contract and during the procurement process evidence of bidders knowledge and compliance on GDPR is established.</li> </ul>			
<b>Gaps in Controls</b>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> No - No controls have been tested	<b>Analysis and Findings of Control Testing</b>		
<b>Adequacy of Controls:</b> Adequate			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

**Risk Rationale/Comments:** Marsland, Mr Colin reviewed this risk in 03 Dec 2025

The current risk score for IG training compliance by non-NHS staff has been revised upwards following a query at IGG regarding the mismatch in the risk scores between NHS Shetland staff and non-NHS staff. A review of these scores identified that the 'Consequence' rating for non-NHS staff had been set too low (i.e. at Moderate rather than Major). Correction of this issue has raised the overall risk score. The overall risk score is lower for non-NHS staff than it is for NHS Shetland staff because the 'Likelihood' rating for non-NHS staff is set at 'Possible'. It is 'Likely' for NHS Shetland staff. The reduction in 'Likelihood' for non-NHS staff is due to there being fewer non-NHS staff and therefore fewer opportunities for the risk to materialise.

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1482 Clinical Governance and Assurance</b>		<b>Strategic ID: SR09 (1482)</b>	
<b>Risk Description:</b> <b>IF:</b> If we continue with current clinical governance process <b>THEN:</b> There is risk of patient harm because of incomplete governance and assurance processes <b>RESULTING IN:</b> which results in a poor learning system, repeat safety events and a lack of quality improvement and there is no culture of learning.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> </ul>		<b>Risk Appetite - High (3 - Open)</b>  We would be keen to take some risk to change the culture regarding the embedding of good end to end governance and assurance processes.	
<b>Risk Response:</b> Tolerate		<b>Standing Committee:</b> Clinical Governance Committee (CGC)	
<b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions	<b>Consequence:</b> Moderate	<b>Current Risk Level &amp; Rating:</b> Medium Risk <b>9</b>	<b>Risk Owner &amp; Review Date:</b> Brightwell, Kirsty <b>31 Mar 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Establishment of the Clinical Governance Committee</li> <li>Visibility of a senior clinical post in clinical governance</li> <li>Re-introduction of the Clinical Governance afternoons</li> <li>Operational Clinical Governance Group established</li> <li>Completed the review of the role of JGG to provide a forum for system wide learning</li> <li>Linking of CG Team into clinical operational CG activity</li> <li>Board wide support for SIF programme for QI work</li> <li>Implementation of Performance Monitoring Group for IJB delegated services</li> </ul>			
<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>None</li> </ul>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> No - No controls have been tested	<b>Analysis and Findings of Control Testing</b>		
<b>Adequacy of Controls:</b> Adequate			
<b>Risk Rationale/Comments:</b> Brightwell, Kirsty reviewed this risk in 13 Oct 2025  Operational clinical governance committee established. Clinical Governance action plan compiled.			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1354 Capacity for Sustainable Change</b>		<b>Strategic ID: SR12 (1354)</b>	
<b>Risk Description:</b> <b>IF:</b> If the Boards limited capacity to oversee change could mean that changes occur in an uncontrolled manner. <b>THEN:</b> Then uncontrolled change could increase risks to patient care as new processes, technology, workforce, or change is implemented without adequate consideration of its impact <b>RESULTING IN:</b> Resulting in disruption to processes, unwarranted variation and untoward or unforeseen events leading to patient harm.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> </ul>		<b>Risk Appetite - Very High (4 - Seek or 5 Mature)</b>  With the greater degree of uncertainty facing the NHS and the historical lack of change we need to take a greater degree of risk than was previously accepted, however this risk appetite is off set by the increased resilience provided by the PMO	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Clinical Governance Committee (CGC)	
<b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions	<b>Consequence:</b> Moderate	<b>Current Risk Level &amp; Rating:</b> Medium Risk <b>9</b>	<b>Risk Owner &amp; Review Date:</b> Chittick, Brian <b>30 Apr 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Implementation of Digital Mindset development across whole organisation</li> <li>Sustainment of LEO training across whole organisation</li> <li>Evolution of PMO into a more focused planning function Jul 23</li> <li>Provision of Service Improvement training available</li> <li>Management bundles developed and in place</li> <li>Service Improvement resource available to support change programme</li> <li>Executive lead for SI identified</li> <li>Digital Startegy Framework being drafted tro outline areas of change required to embrace technology to accelerate change</li> <li>Strategic Delivery Plan being drafted to map the change required</li> <li>Flow of NHSS personnel on to national leadership courses like Leading for Change and Systems Leadership courses</li> </ul>

<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> Yes - All controls have been tested	<b>Analysis and Findings of Control Testing</b>		
<b>Adequacy of Controls:</b> <span style="color: green;">Adequate</span>			
<b>Risk Rationale/Comments:</b> Chittick, Brian reviewed this risk in 31 Oct 2025			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Project management office now in place to provide a source of support to pace of service changes in the organisation.
- Thirteen waves of the local service improvement course have been completed.
- The number of staff members who have completed the nation training courses on service improvement has increased.
- Central support on sharing best practise and case studies service change adds support.

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1471 Workforce</b>		<b>Strategic ID: SR08 (1471)</b>	
<p><b>Risk Description:</b>  <b>IF:</b> If NHS Shetland is unable to have sufficient qualified, competent staff to meet existing service delivery plans <b>THEN:</b> Then there is a risk that service provision and the quality of care provided, including existing staff will be negatively impacted <b>RESULTING IN:</b>  Resulting in</p> <ul style="list-style-type: none"> <li>- poorer clinical outcomes for patients</li> <li>- increased waiting times</li> <li>- impact on the continuity of care</li> <li>- increase in off-island service delivery</li> <li>- increase in complaints and claims</li> <li>- negatively impacting on the health and wellbeing of existing staff, potentially increasing sickness/absence rates</li> <li>- higher financial costs due to increased used of agency staff to maintain services</li> <li>- higher recruitment costs due to increased frequency of staff turn over</li> <li>- reputational damage</li> <li>- Lack of CPI Violence and Aggression and/or Moving &amp; Handling Stat/Mand training delivery due to limited resilience within the Health &amp; Safety Team</li> </ul>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>• To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> <li>• To provide best value for resources and deliver financial balance.</li> <li>• To ensure sufficient organisational capacity and resilience.</li> </ul>		<p><b>Risk Appetite</b> - Very High (4 - Seek or 5 Mature)</p> <p>Work is ongoing at a national level with relevant Deaneries. It is hoped that the work undertaken in Scotland around pay reform will support individuals seeking to work in Scotland and the work on remote and rural facilitated by Medical Education and the Viking conference will show the benefit of working in remote, rural and island and delivering generic services. The Board is also undertaking a further 2 rounds in 2025 of International Nurse Recruitment to recruit 2 nurses in each cohort to support staffing requirements and maintain service delivery</p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Audit Committee (AC), Finance and Performance Committee (FPC), Staff Governance Committee (SG)</p>	
<p><b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions</p>	<p><b>Consequence:</b> Moderate</p>	<p><b>Current Risk Level &amp; Rating:</b> Medium Risk <b>9</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Hall, Lorraine <b>31 Oct 2026</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>• 2025 Workforce plan being developed by managers and Directorates for 2025 with further work progressing to look at 3 year staffing needs</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Good use of on contract Agency Locums and supplementary staffing as evidenced by Finance and the Liaison Performance Report
- Recruitment of international nurses - positive integration into services. Further two rounds scheduled in 2025
- Increase in the young workforce and apprentices working within the Board
- Positive feedback from career fairs locally that has supported staff in facilities and 2 going to train as AHPs
- Integration of service and financial plans for the workforce plan, being clear around the 3 elements. What is the level of service currently provided benchmarked nationally and at what cost with what levels of staff/ what would the service look like if staffing numbers were in budget and what would a future skilled workforce look like
- Look to continue good outcomes on iMatter around staff understanding their role, support from their teams, recognising their contribution and recommending NHS Shetland as a good place to work, therefore motivation for working with NHS Shetland positive and link to retention
- The Board remains best in class for territorial boards at promoting attendance with good practice being shared with other Boards as part of national 15box grid and supports NHS Shetland as a good place to work (retention) with the recruitment of the new Snr Occupational Health Nurse we will reinforce wellbeing and look to understand what further activities can be undertaken around mental good health and resilience
- Reduction by 4% of turnover and work being undertaken on exit process
- Board reports on quality, performance or complaints from a service perspective highlight no issues
- Senior leadership team supporting direction so that staff feel engaged in the organisation
- Varied leadership national portfolio and readiness activities for next level of careers that we are linking in with locally
- Outputs from Speak Up week showing positive movement on culture
- Work by HR and communications on social media advertising to support attraction
- Workforce reports to APF and Staff Governance Committee providing input and narrative around workforce areas
- Wellbeing group
- Locum / agency provision processes well established with reduced costs and increased quality of personnel
- Appraisal system in place to aid in the development of succession planning and retention of staff
- Risk highlighted to NHS Shetland Board and Scottish Government

### Gaps in Controls

- External factors outwith our control including reduction in student nurse enrolments
- Increase in the number of resident doctors impacting on existing supporting staff
- Reduction in bursary for all NMAP in Scotland. Changes to university funding
- Low numbers of appraisals impacting on succession planning and retention

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** Adequate

**Risk Rationale/Comments:** Hall, Lorraine reviewed this risk in 08 Apr 2026

This risk will remain at medium risk whilst we continue to rely on high cost supplementary staffing.

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1489 Business Continuity Plans</b>		<b>Strategic ID: SR10 (1489)</b>	
<p><b>Risk Description:</b>  <b>IF:</b> If services/departments do not have business continuity plans in place <b>THEN:</b> Then there is a risk that we will not meet the Board's statutory obligations and in the event of a significant disruptive event, we will fail to deliver essential care to the population of Shetland and the recovery of services after the event will be delayed [BCP risk]  <b>RESULTING IN:</b> Resulting in potentially harm to patients, staff, public; additional costs to the Board; reputational harm. And the post incident scrutiny by Government and regulatory/investigative bodies could lead to adverse impact on reputation of individuals and of the organisation.</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<p><b>Risk Appetite - Moderate (2 - Cautious)</b></p> <p>Emergency planning / business continuity based on clear processes to minimise risk &amp; reputational damage</p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Finance and Performance Committee (FPC)</p>	
<p><b>Likelihood:</b> Unlikely - Not expected to happen, but definite potential exists</p>	<p><b>Consequence:</b> Major</p>	<p><b>Current Risk Level &amp; Rating:</b> Medium Risk <b>8</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Laidlaw, Dr Susan <b>30 Sep 2026</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>Electronic BCM system to facilitate the development, management and performance management of BIAs and BCPs in NHS Shetland.</li> <li>BC policy approved</li> <li>Governance structure reviewed and new processes in place to provide assurance to EMT and Board</li> <li>Review and development of service business continuity and recovery plans with an update and review process.</li> <li>Membership of Highlands and Islands Emergency Planning Group/Forum.</li> <li>Fully engaged with interagency response through Shetland Emergency Planning Forum.</li> <li>Reciprocal arrangement for mutual aid across North of Scotland.</li> <li>Participation in national and local training and exercising programme.</li> <li>Self-assessment against national Standards for Organisational Resilience and Development of prioritised action plan updated in 2022.</li> </ul>			
<p><b>Gaps in Controls</b></p> <ul style="list-style-type: none"> <li>BC&amp;R Officer is single handed-fragile service</li> <li>Gaps in service business continuity plans.</li> <li>Limited capacity within depts to complete the updating of plans, to train staff in business continuity planning and lack of a formal training needs assessment.</li> </ul>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- A number of NHS Shetland plans not exercised and out with their planned review date.
- Lack of surge capacity to cover all roles in a major incident.

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

Yes - Some controls have been tested

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** Adequate

**Risk Rationale/Comments:** Laidlaw, Dr Susan reviewed this risk in 08 Apr 2026

- Response to COVID 19 has activated many business continuity plans which require updating in light of lessons learned.
- Response to COVID 19 has reduced capacity to keep plans up to date.
- EU Exit risks are actively monitored drawing capacity from the wider agenda.

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1274 Urgent/Emergency/Unscheduled Care</b>		<b>Strategic ID: SR15 (1274)</b>	
<b>Risk Description:</b> <b>IF:</b> If there is a patient requiring emergency care on an outer islands of Shetland <b>THEN:</b> There is a risk that patients will experience delays in transfer <b>RESULTING IN:</b> resulting potentially in poorer clinical outcomes and a negative impact on the small teams/individual providing care to outer islands			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<b>Risk Appetite - Moderate (2 - Cautious)</b>  Risk appetite is being supported by a quality improvement project	
<b>Risk Response:</b> Tolerate		<b>Standing Committee:</b> Clinical Governance Committee (CGC)

<b>Controls</b> <ul style="list-style-type: none"> <li>Test of change regarding use of health hubs being explored</li> <li>First responder training being rolled out in collaboration with SFRS and SAS</li> <li>Liaison with local SAS reps to develop remote access to urgent care provided by SAS via NearMe for non-doctor islands</li> <li>Liaison between SAS and DCHSC and MD to review first responder models in the outer isle's</li> <li>The controls which are in place are owned by the SAS and include:               <ul style="list-style-type: none"> <li>Provision of emergency and urgent retrieval by MCA</li> <li>Revised protocol circulated (clarity that Jigsaw not available)</li> <li>Supporting SAS air cover from Helimed helicopters</li> <li>Inter-island flights (during business hours)</li> <li>Adverse events and collective learning takes place via the Ambulance Operational Group</li> </ul> </li> <li>There is now appropriate representation at Ambulance Liaison Group meeting with a balance between SHB and SAS with regional managers from SAS now involved</li> </ul>			
<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>Gaps in NDI nursing capability whilst remodelling of island nursing capability takes place and this will affect first responder capability</li> </ul>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> Yes - All controls have been tested	<b>Analysis and Findings of Control Testing</b>  Further review during Exercise Pegasus (Sept 2025).		

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

**Adequacy of Controls:** Adequate

**Risk Rationale/Comments:** Brightwell, Kirsty reviewed this risk in 10 Feb 2025

The number of times that patients have required urgent retrieval is small (approximately 12-15 transfers per year). However when it is needed it has to happen so this small number is irrelevant. If a patient requires urgent transfer and the timeframe of 3 hours+ does not fit with the patients clinical condition or other factors such as the weather mean that immediate transfer is necessary, then the clinician (GP or Non Doctor Island Nurse) can ask SAS to upgrade the response to an emergency and the Maritime Coastguard Agency (MCA) will provide air retrieval instead. The majority of urgent transfers in 2014 were completed by MCA in any case because the Jigsaw helicopter was unavailable. Based on historical experience and the data available, the likelihood of the MCA or SAS air ambulance resources being unavailable or out of range at the same time in low. In noting this, we don't have any data on the H145 (or previous helicopter airbus models) as they very rarely come to Shetland. In light of the fact that activity levels will always be low it is difficult to quantify the probability of air ambulance or MCA resources being unavailable at the same time and the risk that creates in service provision.

This aircraft is now being shared with the Western isles, Orkney and the North of Scotland so what with weather distance, icing and the possibility of simultaneous missions the likelihood of the H145 being available is not well quantified.

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1275 Paediatrics</b>		<b>Strategic ID: SR03 (1275)</b>	
<b>Risk Description:</b> <b>IF:</b> We lack a specialist workforce for very sick children or children who are deteriorating <b>THEN:</b> we are reliant on generalists working with remote support <b>RESULTING IN:</b> the risk of an avoidable adverse event or adverse clinical outcome and leading to difficulties in recruitment and retention of generalist staff			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<b>Risk Appetite - Low (1 - Minimal)</b>  Low risk appetite due to the nature of the patients and the risk to reputational damage. Need to ensure strict risk boundaries and safety netting required.

<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>Have the Controls Been Tested</b> Yes - All controls have been tested	<b>Analysis and Findings of Control Testing</b>
<b>Adequacy of Controls:</b> Adequate	
<b>Risk Rationale/Comments:</b> Brightwell, Kirsty reviewed this risk in 10 Feb 2025  Not fully recruited to emergency medicine currently. Paediatrician recently recruited, yet to see full impact on service.	

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1540 Risk of CBRN contamination</b>		<b>Strategic ID: SR18 (1540)</b>	
<p><b>Risk Description:</b>  <b>IF:</b> If there is an inadequate response to a Chemical Biological Radiological and Nuclear (explosives) CBRNe incident <b>THEN:</b> Then there is a risk of patients, staff, public and premises being contaminated. There is a potential loss of the entire hospital premises if contaminated. This could have a knock-on effect to the rest of Shetland and an inability to deal with other incidents. [CBRN risk]  <b>RESULTING IN:</b> Resulting in potential morbidity and mortality, loss of services, financial and reputational loss. A knock-on effect to other Shetland services</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<p><b>Risk Appetite - Low (1 - Minimal)</b></p> <p>The inability to successfully deal with a CBRN incident at GBH will potentially halt acute services - this may not be a short term disruption depending on the contaminant.</p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Clinical Governance Committee (CGC)</p>	
<p><b>Likelihood:</b> Unlikely - Not expected to happen, but definite potential exists</p>	<p><b>Consequence:</b> Major</p>	<p><b>Current Risk Level &amp; Rating:</b> Medium Risk <b>8</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Laidlaw, Dr Susan <b>30 Sep 2026</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>Decon response part of Major Incident Plan</li> <li>12 PRPS (Powered Respirator Protective Suits) provided by SG</li> <li>'Dry decontamination' IOR on-line training module available to all staff</li> <li>RBCO has attended PRPS Instructor training</li> <li>Some staff are trained in the operation of the suits</li> <li>Estates test decontamination tent intermittently &amp; make repairs etc</li> <li>RBCO Officer trained in managing a CBRN incident</li> <li>New training suits have been made available</li> <li>Some SG support is being provided to improve overall capacity</li> <li>RBCO is developing an Island Model of CBRN response involving partners</li> <li>Decon unit has been sourced - awaiting placement at GBH</li> </ul>			
<p><b>Gaps in Controls</b></p> <ul style="list-style-type: none"> <li>IOR kits not deployed</li> <li>No budget for training and equipment</li> <li>No training for incident managers / team leaders at any level as yet</li> <li>CBRN plan not yet tested since relocation of wet decon kit</li> <li>No on-island SOR trainers - provided by SAS</li> <li>No Islands Model that will protect the hospital from decontamination</li> </ul>			
<p><b>Robustness of testing the controls recorded:</b> (added 26<sup>th</sup> April 2023)</p>			
<p><b>Have the Controls Been Tested</b></p>		<p><b>Analysis and Findings of Control Testing</b></p>	

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<p>Yes - Some controls have been tested</p>	<p>This risk does not has a BCP plan as this is part of other BCP plans in place.</p> <p>Tent has been erected, however time taken to assemble the tent took over 1 hour with full staffing and favourable weather conditions. Subsequently out of hour reponses will be challenging and weather could affect assembly time significantly.</p> <p>Recommendation from testing:  a) Develop Islands Model where the tent deployed by HMCB. Update by end January 2025</p> <p>b) Examine the possibility of a fixed structure solution (re-use of existing infrastructure). Discussion to be progress by the end of January 2025. This would mitigate the need to strip individuals in a public space during decontamination which increases the risk of embarrassments and physical harm (hypothermia) as well as reputational damage to the organisation.</p> <p>Currently this is not a viable option until the scoping exercise relating to fixed sites is completed. IOR is the only viable option at this moment in time and progression by January 2025.</p>
<p><b>Adequacy of Controls:</b> <span style="color: red;">Inadequate</span></p>	
<p><b>Risk Rationale/Comments:</b> Laidlaw, Dr Susan reviewed this risk in 08 Apr 2026</p> <p>The current consequence is slightly reduced due to the above controls. It will not achieve moderate consequence until the gaps are addressed.</p>	

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 4 - Strategic Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1598 Strategic Financial Management Operation</b>		<b>Strategic ID: SR22 (1598)</b>	
<p><b>Risk Description:</b>  <b>IF:</b> operational management issues, which are not in alignment with the Board's financial planning and performance limits <b>THEN:</b> There is a risk that we fail to optimise the effectiveness and efficiencies of our resource allocation in a sustainable long-term basis in-line with our statutory obligations.</p> <p>1) Failure to achieve our organisational objectives and deliver our outcome targets;                  2) The board's actual expenditure will be greater than resource limits;                  3) Implementation of a recovery plan with a likely negative impact on services through cost reduction and voidance;                  4) Adverse reputational impact as may be subject to detailed external scrutiny and intervention; and                  5) Scottish Government performance risk rating matrix score increases to reflect deterioration in the effective management of resources.</p> <p><b>RESULTING IN:</b></p> <p>1) If we fail to maximise effective use of the Boards resources and assets, then we will not deliver the financial plan                  2) Failure to deliver financial targets would result in development of a recovery plan to tackle financial gap.                  3) Likely impact of recovery plan on our services will cause deterioration in our performance outcome targets.                  4) Recovery plan is likely to impact on some operational delivery. Non-clinical vacant posts would likely be held, reviews of process and services would be undertaken to resize within the available resource limits.                  5) Recovery plan is likely to impact on vacancies in clinical posts and possible skill mix reviews of our clinical services to reduce cost to resize within the available resource limits.                  6) Would damage the Board's reputation as an effective healthcare provider with SGHD and with the public.                  7) Can lead to Scottish Government direct intervention in the day-to-day operations of the Health Board.</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>• To provide best value for resources and deliver financial balance., To ensure sufficient organisational capacity and resilience.</li> </ul>		<p><b>Risk Appetite - None (0 - Avoid)</b></p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Finance and Performance Committee (FPC)</p>	
<p><b>Likelihood:</b> Unlikely - Not expected to happen, but definite potential exists</p>	<p><b>Consequence:</b> Minor</p>	<p><b>Current Risk Level &amp; Rating:</b> Medium Risk <b>4</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Chittick, Brian <b>31 Mar 2026</b></p>
<p><b>Controls</b></p>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

- Standing Financial Instructions set out the parameters to guide budget holders in their delegated management authority
- Monthly budget management statement to budget holders to aid their role in management of delegated budget
- Management accountants holding meetings with budget holders to aid their role in management of delegated budget
- Directorate team meetings that discuss the directorates financial performance and agree corrective team actions
- Internal audit assignments to identify opportunities for improved governance
- Discussion of the Boards financial performance at Area Partnership Forum so we are transparent with staff
- Executive Management Team discussions on the Board's financial performance and agreeing collective actions
- Financial reports to both the Board and Finance and Performance Committee
- Finance and sustainability group working upon and monitoring delivery of cost reduction programmes and service redesign to deliver savings targets.
- External audit annual review and report to the Directors on the Boards financial and non-financial out comes that includes a management action plan to address areas of weakness
- PECOS User group meetings
- Scottish Government scrutiny via standard financial returns and ad-hoc returns on specific services or through bench-marking performance statistics

### Gaps in Controls

- Lack of available training on effective budget management;
- Need to secure training for budget holders to support overall financial governance;
- Effective training on use of systems the board uses such as PECOS, Stores Ordering, SSTS, Optima, eEEs or process for submitting staff termination or change forms;
- Historic inability to manage services within the resources delegated to budget holders for various external reasons;
- Ability to recruit and/or retain key staff to ensure safe and effective services creates gaps in workforce that can cause the use of staff at premium rates above NHS terms and conditions that will result in costs that are higher than the budget allows leading to unfunded cost pressures.

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** Adequate

**Risk Rationale/Comments:** Chittick, Brian reviewed this risk in 15 Jan 2026

Board's out-turn projections continue to forecast a breakeven position at month 9. This is based upon current expenditure trajectories and expected in year funding allocations for 2025-26.

<p><b>Likelihood:</b> Unlikely - Not expected to happen, but definite potential exists</p>	<p><b>Consequence:</b> Negligible</p>	<p><b>Current Risk Level &amp; Rating:</b> Low risk <b>2</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Chittick, Brian <b>30 Sep 2026</b></p>

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

### Controls

- Creation of an annual delivery plan to set out the goals, targets and outcomes.
- Financial plan setting out investments and the gap to address via efficiency savings plans
- Standing Financial Instructions set out the parameters to guide budget holders in their delegated management authority
- Finance and Performance committee seeking assurance on behalf of the Board through relevant reports to the committee on a quarterly basis
- Finance and Performance committee scrutiny and review of the development of the Annual Delivery Plan and Financial Plan on behalf of the full Board
- Board review and approval of the Annual Delivery Plan and Financial Plan
- Monitoring reports to each Board meeting and public scrutiny of these reports
- External Audit annual review and report to the Directors on the Boards financial and non-financial out comes that includes a management action plan to address areas of weakness

### Gaps in Controls

- Plans not being in place prior to start of year may cause uncertainty and delay the implementation of plans to deliver the annual delivery plan.
- Accountability for managing the resources delegated to budget holders

**Robustness of testing the controls recorded:** (added 26<sup>th</sup> April 2023)

**Have the Controls Been Tested**

**Analysis and Findings of Control Testing**

**Adequacy of Controls:** Adequate

**Risk Rationale/Comments:** Chittick, Brian reviewed this risk in 15 Jan 2026

In the Scottish Budget for 2026-27 the allocations announced includes Â£3.8m in NRAC parity funding for Shetland Health Board. This funding will fully eliminate the structural deficit of the Board. As a result Shetland Health Board may be the only territorial Board in Scotland that does not have an underlying structural deficit. Therefore the Board in planning for 2026-27 is currently in a financial sustainable position. Planning for sustainable investment to achieve the Board's three key organisational objectives is possible whilst still delivering the Scottish Government targets on delivering efficiency for NHS Scotland.

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 3 - Organisational Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1378 Outdated Policies &amp; Official Documents</b>		<b>Strategic ID:</b>	
<p><b>Risk Description:</b>  <b>IF:</b> If policies and official documents and official documents are not regularly reviewed and, where necessary, updated <b>THEN:</b> Then NHS Shetland may be directing staff to undertake their duties on the basis of inaccurate information which may also be unlawful.  <b>RESULTING IN:</b> Resulting in harm to patients/staff and/or regulatory action and/or financial penalty and/or reputation damage.</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> </ul>		<p><b>Risk Appetite - Moderate (2 - Cautious)</b></p> <p>The maintenance of an up-to-date policy environment is a foundational component of good governance. A more open/mature approach to risk is reasonable where a robust and well defined policy framework is in place. A well defined policy framework guides and determines the boundaries of acceptable risk. In the absence of such an environment NHS Shetland will require a more cautious approach to risk.</p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Finance and Performance Committee (FPC), Information Governance Group (IGG)</p>	
<p><b>Likelihood:</b> Almost certain - Expected to occur frequently, more likely to occur than not</p>	<p><b>Consequence:</b> Moderate</p>	<p><b>Current Risk Level &amp; Rating:</b> High risk <b>15</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Marsland, Mr Colin <b>28 Feb 2026</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>NHS Shetland has implemented a 'Framework for Document Development' .</li> <li>NHS Shetland maintains and regularly reviews the Document Register at IGSG</li> <li>Staff guidance on document management has been published on the intranet.</li> <li>Introduction of PolicyStat - policy management platform</li> </ul>			
<p><b>Gaps in Controls</b></p> <ul style="list-style-type: none"> <li>The 'Document Register' is an 'in house' tool that lacks the functionality to properly manage NHS Shetland's official document library.</li> <li>NHS Shetland needs an electronic document management system</li> </ul>			
<p><b>Robustness of testing the controls recorded:</b> (added 26<sup>th</sup> April 2023)</p>			
<p><b>Have the Controls Been Tested</b> Yes - Some controls have been tested</p>	<p><b>Analysis and Findings of Control Testing</b> Repeated requests for documents to be reviewed and updated have not led to significant improvements.</p>		
<p><b>Adequacy of Controls:</b> <span style="color: green;">Adequate</span></p>			
<p><b>Risk Rationale/Comments:</b> Marsland, Mr Colin reviewed this risk in 03 Dec 2025</p> <p>No change to the current score. Score expected to reduce during 25/26 because EMT approved funding for the purchase of a policy management software on 26/02/2025. The software will improve the ease and efficiency of policy development and management. Phased implementation of the product will begin in April 2025.</p>			

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 3 - Organisational Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1661 Impact of lift failure at GBH</b>		<b>Strategic ID:</b>	
<b>Risk Description:</b> <b>IF:</b> Both hospital lifts fail <b>THEN:</b> We will need to transfer patients on the upper levels and start a phased hospital evacuation with the support of neighbouring hospitals, local emergency planning partners and SAS. <b>RESULTING IN:</b> An evacuation of acute patients from the hospital site and a local major incident being triggered			
<b>Organisation Objectives</b>		<b>Risk Appetite - Low (1 - Minimal)</b>	
<ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		The failure of the lifts would result in a phased, full evacuation of the hospital	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Hospital Management Team (HMT)	
<b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions	<b>Consequence:</b> Extreme	<b>Current Risk Level &amp; Rating:</b> High risk <b>15</b>	<b>Risk Owner &amp; Review Date:</b> Carolan, Kathleen <b>01 Jun 2026</b>
<b>Controls</b>			
<b>Gaps in Controls</b>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> Yes - Some controls have been tested	<b>Analysis and Findings of Control Testing</b> We have a high level BCP in place to enable triage and decision making based on the predicted timeline for the repair of the failed lift or lifts. Over 80 members of staff have been trained to use equipment to bring patients down to lower levels if needed. Insitu simulations have been run for managing an obstetric emergency in the event of lift failure. We do not have a fully worked through evacuation plan with SAS and local emergency planning partners.		
<b>Adequacy of Controls:</b> <b>Inadequate</b>			
<b>Risk Rationale/Comments:</b> Carolan, Kathleen reviewed this risk in 16 Mar 2026  Whilst we have a BCP to move patients to the ground floor and triage patients for a suitable place of safety and onward transfer - we do not have a clearly defined BCP in place with SAS or local providers in the event that we had to undertake a controlled evacuation. In addition to this, we do not currently have a business case in place to replace the lifts and funding to support the project.			

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 3 - Organisational Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1535 Incomplete Reviews of IG Documentation</b>		<b>Strategic ID:</b>	
<b>Risk Description:</b> <b>IF:</b> If there is insufficient time to conduct effective reviews of DPIAs/DSAs/DPAs. <b>THEN:</b> Then the security of patient and staff data, and/or the contractual obligations of NHS Shetland will not be adequately assessed. <b>RESULTING IN:</b> Resulting in NHS Shetland being legally and/or contractually exposed, and/or experiencing reputational damage, and/or projects/services to improve patient care being delayed.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> </ul>		<b>Risk Appetite - Moderate (2 - Cautious)</b> Breaches in the security of patient or staff data can have a significant impact on the organisation's reputation, the trust of patients and staff and can result in financial penalty. Anything higher than 'Cautious' is not compatible with the legal obligations placed on NHS Shetland by legislation and NHS Scotland standards.	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Finance and Performance Committee (FPC), Information Governance Group (IGG)	
<b>Likelihood:</b> Likely - Strong possibility that this could occur, likely to occur	<b>Consequence:</b> Moderate	<b>Current Risk Level &amp; Rating:</b> High risk 12	<b>Risk Owner &amp; Review Date:</b> Marsland, Mr Colin <b>28 Feb 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>The IG Team tracks all DPIA/DSA/DPA requests and attempts to prioritise them.</li> <li>The IT support the DPIA/DSA/DPA process by completing SSPs and providing information about technical controls</li> </ul>			
<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>Insufficient time for DPO and IG staff to review all the required IG documentation.</li> <li>IT staff have insufficient capacity to complete the SSP work in a timely manner. This can create DPIA bottlenecks and delays to projects/improvements being implemented.</li> </ul>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> Yes - Some controls have been tested	<b>Analysis and Findings of Control Testing</b>		
<b>Adequacy of Controls:</b> <b>Inadequate</b>			
<b>Risk Rationale/Comments:</b> Marsland, Mr Colin reviewed this risk in 03 Dec 2025  Risk reduced slightly because the new CRM started in post on 03/02/202. However, this coincides with the retirement of the current Head of IG. The IG function is likely to remain under pressure until the proposed departmental restructuring in 25/26 is completed.			

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 3 - Organisational Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1616 Lack of Emergency Lone Worker System</b>		<b>Strategic ID:</b>	
<b>Risk Description:</b> <b>IF:</b> If a lone worker is rendered unconscious or otherwise unable to raise the alarm themselves, <b>THEN:</b> Then there is a high risk a lone worker related emergency goes undetected for a protracted period of time. <b>RESULTING IN:</b> Resulting in serious harm, which will be exacerbated the longer it takes to raise the alarm.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> </ul>		<b>Risk Appetite - High (3 - Open)</b>  As at 03/04/2026, the OT Department staff remain unregistered as staff are failing to complete and return their registration forms to the Health & Safety Team for processing and upload into the PeopleSafe system. This prevents the issue of the fobs and training on fob use to staff in the OT Department. Chances of HSE enforcement action following a lone worker related incident resulting in serious harm are real & consequences would be significant. Introduction of a lone worker emergency alert system would mitigate against potential HSE prosecution.	
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Digital Governance Group (DGG), Health, Safety and Wellbeing Committee	
<b>Likelihood:</b> Unlikely - Not expected to happen, but definite potential exists	<b>Consequence:</b>  Major	<b>Current Risk Level &amp; Rating:</b> Medium Risk <b>8</b>	<b>Risk Owner &amp; Review Date:</b> Hall, Lorraine <b>31 Jul 2026</b>
<b>Controls</b> Current controls are informal in nature and individual to community based services			
<b>Gaps in Controls</b>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> Yes - All controls have been tested	<b>Analysis and Findings of Control Testing</b>  PeopleSafe Lone Worker Fobs are tested as they are issued to staff as part of their training in how to use the fobs. Usage of the Fobs can be monitored by the H&S Team, and further support provided to staff as required until the system is fully embedded.		
<b>Adequacy of Controls:</b> Adequate			
<b>Risk Rationale/Comments:</b> Hall, Lorraine reviewed this risk in 03 Apr 2026  All Community based Departments with Lone Working staff have completed and returned the majority of their registration forms (95% completed). Remainder of staff (5%) are at higher risk.			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 2 - Directorate Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1259 Medical Staffing</b>		<b>Strategic ID:</b>	
<p><b>Risk Description:</b>  <b>IF:</b> If we fail to successfully recruit to and support the senior medical team (Consultants, GP) to manage the complexity of demand <b>THEN:</b> Then there is a risk of continual reliance on a temporary workforce <b>RESULTING IN:</b> resulting in financial sustainability and inability to progress education and learning and service development.</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To redesign services where appropriate, in partnership, to ensure a modern sustainable local health service.</li> <li>To provide best value for resources and deliver financial balance.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>	<p><b>Risk Appetite - High (3 - Open)</b></p> <p>Due to dependency on locum and related financial pressure, we need to be more innovative in recruiting and retaining the medical workforce.                      [05/03/2019 11:49:05 Brian Chittick] Need to provide core workforce for Consultant led services as well as within the Junior Doctor cadre for OOHs coverage. However also need to acknowledge the difficulty in recruiting to an R&amp;R location and hence the need to be innovative/resourceful in workforce planning and recruitment/retention. This increases the risk appetite as we push the boundaries as to the art of the possible with regard to workforce planning.</p>		
<b>Risk Response:</b> Treat - plan to reduce level of risk		<b>Standing Committee:</b> Clinical Governance Committee (CGC)	
<p><b>Likelihood:</b> Likely - Strong possibility that this could occur, likely to occur</p>	<p><b>Consequence:</b> Major</p>	<p><b>Current Risk Level &amp; Rating:</b> High risk <b>16</b></p>	<p><b>Risk Owner &amp; Review Date:</b> Brightwell, Kirsty <b>31 Jan 2026</b></p>
<p><b>Controls</b></p> <ul style="list-style-type: none"> <li>Engagement with national strategies to enhance recruitment in remote and rural settings.</li> <li>Primary Care strategy will ensure as robust a model as possible.</li> <li>Regular meetings with Scottish Government medical workforce advisers</li> <li>ANPs undertaking triaged primary care clinics at weekends commenced February 2017</li> <li>Clinical development fellow was created and recruited to from December 2017.</li> <li>Consultant physician - Consultants currently on fixed term locum contracts</li> <li>Using the lessons from the success of the GP Hub and transposing the project into acute sector</li> <li>National Recruitment process used for recruitment of Consultant psychiatrist</li> <li>NHS Shetland becoming host Board for new GP hub</li> <li>Engagement with the Global Health Academy to work in collaboration in exploiting global citizenship opportunities to recruit</li> <li>Collaborating with NES on fellowship posts</li> <li>Utilising Rural Credential route for engagement of General Medical workforce</li> </ul>			
<b>Gaps in Controls</b>			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

Failure of the national recruiting process to fill all junior doctor posts Inability to influence the national picture of consultant shortages across many specialities Difficulty in training other professionals to fill gaps in workforce	
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)	
<b>Have the Controls Been Tested</b> Yes - Some controls have been tested	<b>Analysis and Findings of Control Testing</b>  We can work safely with non-consultant grades providing 1st on cover with consultants available as required.
<b>Adequacy of Controls:</b> <span style="color: green;">Adequate</span>	
<b>Risk Rationale/Comments:</b> Brightwell, Kirsty reviewed this risk in 13 Oct 2025  Review of current workforce skills and needs suggests recruiting to traditional consultant full time posts is unlikely to result in a sustainable team.	

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 2 - Directorate Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1612 Medicine Cost Instability</b>		<b>Strategic ID:</b>	
<b>Risk Description:</b> <b>IF:</b> External to system factors influencing the cost of medicines continue to exist and vary <b>THEN:</b> NHS Shetland will find increasing pressure on limited resource for medicines, and will need to revise planning assumptions for budgeting for medicines costs <b>RESULTING</b> <b>IN:</b> Displacement of resource for use in other areas, increasing pressure on savings targets and compounding financial risk.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient., To provide best value for resources and deliver financial balance., To ensure sufficient organisational capacity and resilience.</li> </ul>		<b>Risk Appetite - Low (1 - Minimal)</b>	
<b>Risk Response:</b> Tolerate		<b>Standing Committee:</b> Area Drugs and Therapeutics Committee (ADTC), Department (Own)	
<b>Likelihood:</b> Almost certain - Expected to occur frequently, more likely to occur than not	<b>Consequence:</b> Moderate	<b>Current Risk Level &amp; Rating:</b> High risk <b>15</b>	<b>Risk Owner &amp; Review Date:</b> McDavitt, Tony <b>31 March 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Financial Monitoring: Regular monitoring of medicine expenditure against the allocated budget is conducted through monthly financial reporting to identify and flag significant variances early.</li> <li>Formulary Management: The Pharmacy Team and Area Drugs and Therapeutics Committee (ADTC) actively influences the local use of medicines and where possible promotes the most cost-effective, clinically-appropriate prescribing choices.</li> <li>National Procurement Adherence: We utilise national procurement frameworks and contracts negotiated by National Services Scotland (NSS) to ensure we benefit from national purchasing power - with assurance internally of acute procurement.</li> <li>Prescribing Efficiency Programmes: Ongoing delivery of prescribing initiatives (e.g., scriptswitch, targeted switches, generic switching, reducing waste) among clinicians to optimise the use of resources within our control.</li> </ul>			
<b>Gaps in Controls</b> <ul style="list-style-type: none"> <li>Unable to influence the market price of medicines. NHS Shetland has no control over national drug tariff agreements, manufacturer pricing, or international supply chain costs.</li> <li>NHS Shetland has to work within the existing Scottish framework for medicines access as set by Scottish Government and ministers.</li> </ul>			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b>		<b>Analysis and Findings of Control Testing</b>	

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 2 - Directorate Risk – April 26</b>	<b>Approval Status: Final approval</b>
<b>Risk ID: 1612 Medicine Cost Instability</b>	<b>Strategic ID:</b>
<b>Adequacy of Controls: <span style="color: red;">Inadequate</span></b>	
<p><b>Risk Rationale/Comments:</b> McDavitt, Tony reviewed this risk in 11 Sep 2025</p> <p>This risk is driven entirely by external factors beyond the control of NHS Shetland. These include, but are not limited to:</p> <ul style="list-style-type: none"> <li>1-National and international inflation.</li> <li>2-Fluctuations in the cost of raw materials for drug manufacturing.</li> <li>3-Complex supply chain issues (impacted by Brexit and global events).</li> <li>4-Changes to national purchasing agreements and drug tariff pricing.</li> <li>5-Introduction of new therapeutics through SMC approval for use in Scotland and broadening use of existing therapeutics in new indications (GLP1s for example in weightloss)</li> </ul> <p>As NHS Shetland is a price-taker within the national system, we cannot influence the source of this cost instability. The Likelihood remains 'Almost certain' due to persistent economic volatility. The 'Moderate' Consequence is also still appropriate, as unbudgeted price increases directly impact our ability to meet savings targets and can displace resources from other planned services.</p> <p>Therefore, the risk rating of 15 (High) remains accurate. This risk should be maintained on the register to ensure a clear and ongoing view of this significant, externally-driven financial pressure.</p>	

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 2 - Directorate Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1571 Audiology- single handed practioner</b>		<b>Strategic ID:</b>	
<b>Risk Description:</b> <b>IF:</b> If the Audiology service is run by a single-handed Audiologist <b>THEN:</b> Then this means there is no resilience to the service and a lack on internal peer audit and clinical support. <b>RESULTING IN:</b> Resulting in professional isolation, reduced opportunity to challenge and improve practice and a reliance on self-inspection audit only.			
<b>Organisation Objectives</b> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<b>Risk Appetite - Moderate (2 - Cautious)</b>	
<b>Risk Response:</b> Tolerate		<b>Standing Committee:</b> Clinical Governance Committee (CGC)	
<b>Likelihood:</b> Possible - May occur occasionally, has happened before on occasions	<b>Consequence:</b> Moderate	<b>Current Risk Level &amp; Rating:</b> Medium Risk <b>9</b>	<b>Risk Owner &amp; Review Date:</b> Carolan, Kathleen <b>31 May 2026</b>
<b>Controls</b> <ul style="list-style-type: none"> <li>Urgent patients can go to NHS Grampian if required</li> <li>Chief Audiologist part of Audiology HoS national group and can seek clinical and operational advice and support through this group</li> <li>Chief Audiologist to have work reviewed annually onsite</li> <li>Prioritisation of workload- ongoing review of waiting times.</li> <li>Triage to most appropriate appointment type to make most effective use of face to face clinic</li> <li>Reintroduction of peer review</li> </ul>			
<b>Gaps in Controls</b> NHS Grampian Audiology department are under considerable pressure with long waiting lists			
<b>Robustness of testing the controls recorded:</b> (added 26 <sup>th</sup> April 2023)			
<b>Have the Controls Been Tested</b> Yes - Some controls have been tested	<b>Analysis and Findings of Control Testing</b>		
<b>Adequacy of Controls:</b> Adequate			
<b>Risk Rationale/Comments:</b> Carolan, Kathleen reviewed this risk in 07 Nov 2025  Work has been undertaken with NHS Grampian to develop closer working and oversight of the audiology service. The job description has been reviewed and updated to ensure prospective applicants understand the nature of the service. The HCSW post is being reviewed to develop the skillset of the current post holder to widen the range of activities they can undertake. Partnership working with RNID is being further developed so that the			

## NHS Shetland Strategic, Organisational and Directorate Risks (Rating $\geq 15$ )

third sector can offer some resilience to the service. We have appointed a new Audiologist into a hybrid role.

NHS Shetland Strategic, Organisational and Directorate Risks (Rating ≥ 15)

<b>NHS Shetland Level 2 - Directorate Risk – April 26</b>		<b>Approval Status: Final approval</b>	
<b>Risk ID: 1609 incorrect storage of medical records</b>		<b>Strategic ID:</b>	
<p><b>Risk Description:</b>  <b>IF:</b> If the records which are currently stored in these folders labelled - no notes - are not correctly stored <b>THEN:</b> Then it poses a risk to patients that clinical decisions will be made without access to full records and information. There is also risk that the board will be unable to produce a full copy of the records held for a patient if requested.  <b>RESULTING IN:</b> This could result in patients experiencing disjointed care, having to repeat diagnostic test such as ECG because the previous result is not within the medical record. Decisions about clinical care/treatments made be made based on partial information. The organisation cannot be assured that medical records are complete and held in accordance with best practice principals.</p>			
<p><b>Organisation Objectives</b></p> <ul style="list-style-type: none"> <li>To continue to improve and protect the health of the people of Shetland.</li> <li>To provide quality, effective and safe services, delivered in the most appropriate setting for the patient.</li> <li>To ensure sufficient organisational capacity and resilience.</li> </ul>		<p><b>Risk Appetite - None (0 - Avoid)</b></p> <p>The storage of these document in folders labelled "no notes" is not in keeping with guidelines for medical records management. The historical practice needs to be corrected by either filing in appropriate medical records or scanning these document into the patients SCI Store records.</p>	
<p><b>Risk Response:</b> Treat - plan to reduce level of risk</p>		<p><b>Standing Committee:</b> Hospital Management Team (HMT), Information Governance Group (IGG)</p>	
<p><b>Likelihood:</b> Unlikely - Not expected to happen, but definite potential exists</p>	<p><b>Consequence:</b> Major</p>	<p><b>Current Risk Level &amp; Rating:</b> Medium Risk 8</p>	<p><b>Risk Owner &amp; Review Date:</b> Carolan, Kathleen 30 Apr 2026</p>
<p><b>Controls</b> ED records will be held for some patients digitally on ED Trak</p>			
<p><b>Gaps in Controls</b> no capacity within the medical records team refile the documents already held in these folders due to the volume of documents.</p>			
<p><b>Robustness of testing the controls recorded:</b> (added 26<sup>th</sup> April 2023)</p>			
<p><b>Have the Controls Been Tested</b></p>		<p><b>Analysis and Findings of Control Testing</b></p>	
<p><b>Adequacy of Controls:</b> <b>Inadequate</b></p>			
<p><b>Risk Rationale/Comments:</b> Carolan, Kathleen reviewed this risk in 07 Nov 2024</p> <p>The practice of creating 'no notes' folders has ceased. Bank staff hours are being utilised to reintegrate the no notes into the correct health records folders. The issues is current - no further records are being added to these folders however there is no capacity within the medical records team refile the documents already held in these folders due to the volume of documents.</p>			

**Estimating risk likelihood and severity:** **Step One** - Look at the text in the box below and decide which descriptor of likelihood best matches your estimation of this particular risk/event.

Descriptor	Description
Almost certain	I would not be at all surprised if this happened within the next twelve months; I would expect this to happen
Likely	It is probable that this will occur sometime in the coming year
Possible	I think this could maybe occur in the next year
Unlikely	I would be mildly surprised if this occurred in the next year; it is unlikely to happen
Rare	I would be very surprised to see this happen in the next twelve months; it is very unlikely to happen

**Step Two** - Find the most realistic outcome for the risk you have identified and move down the left hand column to establish its value. Most risks will have potential impacts under more than one column.

HAZARD IMPACT	Personal Safety	Property loss or damage	Failure to provide Statutory Service or breach of legal requirements	Financial Loss or Increased cost of Working	Personal Privacy Infringement	Environmental	Community/ stakeholders / organisation	Reputation
Insignificant	Minor injury or discomfort to an individual	Negligible property damage	Reported to HSE, Stage 2 complaint	<£50k	Isolated personal detail revealed	Licensable activity occurring without authorisation but not causing pollution	Inconvenience to an individual or small group	Contained within Service Unit
Minor	Minor injury or discomfort to several people	Minor damage to one property	HSE investigation Complaint requiring investigation	£50k to £500k	Isolated sensitive data revealed	Death of invertebrates/ >10 fish, minor visible pollution, minor damage to commercial activity	Impact on an individual or small group	Contained within Service
Significant	Major injury to an individual/ range of moderate injuries to more than one person	Significant damage to small building or minor damage to several properties from one source	Litigation, claim or fine to £250k HSE Improvement Notice served Complaint referred to Ombudsman	£500k to £1m	Several persons details revealed	Environmental damage to > 1km <sup>2</sup> Death of 10-100 fish, long term localised harm/ widespread short-term harm to environment, Significant visible pollution/ damage to commercial activity	Impact on a local community. Impact on Council Service	Local public or press interested
Major	Major injury to several people or death of an individual	Major damage to critical building or serious damage to several properties from one source	Litigation, claim or fine £250k to £1m imposed HSE Prohibition Notice served Adverse report from External Advisor	£1m to £5m	Several persons' sensitive /personal details revealed	Death of animals, substantial harm to human health, wide-spread/ long-term harm, loss/ closure of shellfish/drinking// bathing water, extensive damage/ closure of agriculture/ commercial activities	Impact on several communities. Impact on whole organisation	National public or press interest,
Extreme	Death of several people	Total loss of critical building(s)	Multiple civil or criminal actions. Litigation, claim or fine above £1m or custodial sentence	>£5m	All personal details revealed for many	Permanent damage to a nationally significant population/ to site of special interest	Impact on the whole of Shetland	Senior officer(s) and/or members dismissed/ disqualified. Central takeover of authority

Extreme	5	10	15	20	25
Major	4	8	12	16	20
Significant	3	6	9	12	15
Minor	2	4	6	8	10
Insignificant	1	2	3	4	5
Impact Likelihood	Rare	Unlikely	Possible	Likely	Almost certain

Risk profiles: Green = Low, Amber = Medium, Red = high, Purple = Very high
