**Question/s to be answered**

Following the Grenfell tower fire tragedy in June 2017, public and residential buildings throughout Scotland were checked for potentially combustible cladding.

Can I please ask, since then:

1. How many of your hospital buildings have been identified as having potentially dangerous/combustible cladding?

None

2. How many hospital buildings have had the issues rectified?

N/A

3. How many hospital buildings were given the all clear?

1, NHS Shetland only has 1 hospital the Gilbert Bain Hospital.

4. How much money have you spent so far rectifying any potentially dangerous cladding issues at your hospital buildings since 2017?

Nil

5. How much do you think you may have to spend in future to rectify these issues?

Nil
